From the New York Times—bestselling authors, the “chilling and engrossing” nuclear-showdown thriller with “a multi-megaton wallop” (Chicago Tribune). Originally published during the Cuban Missile Crisis, this suspenseful novel takes off as a group of American bombers—armed with a deadly payload of nuclear weapons—heads towards Moscow, their motives mysterious. Suddenly, a nuclear apocalypse looms closer than it ever has, and the lives of millions depend on the high-stakes diplomacy of leaders on both sides of the divide. The basis for a classic 1964 movie starring Henry Fonda, this two-million-copy bestseller is not only a terrifying thriller, but a fascinating social commentary on Cold War politics and a look at how, in a world poised on the brink, accidents and mistakes can have catastrophic

with personnel of several companies and research laboratories, with the main emphasis on plane stress and transitional fracture behavior. The memorandum presents a brief description of the general approach to the fail-safe problem, an analysis of several of the existing methods that use this approach, including their shortcomings, and a summary of the data required for a good fail-safe design. A specific approach proposed for the presentation in MIL-HDBK-5 of data pertinent to the fail-safe design concept is evaluated in terms of its applicability to that concept. (Author).

In the wide-open landscape of Pennsylvania, Charlotte Martin and her father live a peaceful life on their farm...or so it seems. In truth, the rural locale provides the perfect front for the father-daughter NSA operatives as they expertly carry out their mission: using a high-tech computer system, they protect a team of undercover agents. Some would kill to have access to this system, and it makes Charlotte and her father prime targets. It was only a matter of time before this nightmare unexpectedly crashed down on them, and only Charlotte escaped with her life. Before Dwight Martin dies, though, he initiated the failsafe lockdown, and now Charlotte's the only one who can access the system. Writer Jake Bradford left the serene Blue Ridge Mountains of Virginia for the hustle and bustle of New York to pursue his
