Fc Receptors

Abstract Topics

Immunoglobulins and Fc receptors are critical glycoprotein components of the immune system. Fc receptors bind the Fc (effector) region of antibody molecules and communicate information within the innate and adaptive immune systems.

Online Library

Fc Receptors

Glycosylation of antibodies, particularly in the Fc region of IgG, has been extensively studied in health and disease.

Receptors Definition

Receptors are

proteins, usually cell

surface receptors,

which bind to ligands

and cause responses

in the immune

system, including

cytokine receptors,

growth factor

receptors and Fc

receptor. Receptors

Online Library

Fc Receptors

can be found in

various immune cells
like B cells, T cells, NK
cells, monocytes and
stem cells.
