“Jam packed with insights from women in the field,” this is an invaluable career guide for the aspiring or experienced female tech professional (Forbes) As the CEO of a startup, Tarah Wheeler is all too familiar with the challenges female tech professionals face on a daily basis. That’s why she’s teamed up with other high-achieving women within the field—from entrepreneurs and analysts to elite hackers and gamers—to provide a roadmap for women looking to jump-start, or further develop, their tech career. In an effort to dismantle the unconscious social bias against women in the industry, Wheeler interviews professionals like Brianna Wu (founder, Giant Spacekat), Angie Chang (founder, Women 2.0), Keren Elazari (TED speaker and cybersecurity expert), Katie Cunningham (Python educator and developer), and Miah Johnson (senior systems administrator) about the obstacles they have overcome to do what they love. Their inspiring personal stories are interspersed with tech-focused career advice. Readers will learn:

- The secrets of salary negotiation
- The best format for tech resumes
- How to ace a tech interview
- The perks of both contracting (W-9) and salaried full-time work
- The secrets of mentorship
- How to start your own company
- And much more

BONUS CONTENT: Perfect for its audience of hackers and coders, *Women in Tech* also contains puzzles and codes throughout—created by Mike Selinker (Lone Shark Games), Gabby Weidling (Lone Shark Games), and cryptographer Ryan “LostboY” Clarke—that are love letters to women in the industry. A distinguished anonymous contributor created the Python code for the cover of the book, which references the mother of computer science, Ada Lovelace. Run the code to see what it does!

Discover the work of female artists who have made their mark on the art world. *Women's Art Work* introduces readers to the lives and work of the world's most renowned artists. With a foreword from Tate's first female director, Maria Balshaw, this collection celebrates the creativity of women in more than 30 biographies, investigating their practices and exploring

Access Free Female Innovators At Work Women On Top Of Tech

their contributions to the art world. Readers will learn about a diverse group of innovators like Frida Kahlo, Cindy Sherman, Ana Mendieta, Lubaina Himid, Cao Fei, and the Guerrilla Girls. From early pioneers to today's most radical creators, these women have overcome obstacles, broken boundaries, and enriched our understanding of what art is and can be. With a glossary of art terms, a timeline of major milestones, and educational sidebars, this highly illustrated book is perfect for any art lover. Additionally, it features original interviews with living artists—including Yayoi Kusama, Lorna Simpson, and Rachel Whiteread. Featured artists include: - Eileen Agar - Anni Albers - Louise Bourgeois - Sonia Boyce - Claude Cahun - Judy Chicago - Tacita Dean - Tracey Emin - Cao Fei - Simryn Gill - Guerrilla Girls - Natalia Goncharova - Anthea Hamilton - Barbara Hepworth - Lubaina Himid - Gwen John - Joan Jonas - Frida Kahlo - Yayoi Kusama - Agnes Martin - Ana Mendieta - Berthe Morisot - Georgia O'Keeffe - Paula Rego - Bridget Riley - Doris Salcedo - Cindy Sherman - Lorna Simpson - Dayanita Singh - Gillian Wearing - Rachel Whiteread - Lynette Yiadom-Boakye - Fahrelnissa Zeid

Award-winning author and women's rights advocate Dr. Nina Ansary takes readers on a 4,000-year global and historic journey exposing the repercussions of centuries of gender inequality. In 1929, British novelist Virginia Woolf ran her fingers along the spines of the books in her library wondering why no woman in Shakespeare's era had written "a word of that extraordinary literature when every other man, it seemed, was capable of song or sonnet." She concluded, "Indeed, I would venture to guess that Anon, who wrote so many poems without signing them, was often a woman." Nearly a century after Woolf penned those incisive

Access Free Female Innovators At Work Women On Top Of Tech

words--frequently modified as "For most of history, Anonymous was a woman"--the phenomenon of female anonymity persists as women worldwide continue to be restricted by society's formal and unspoken barriers. - Why does Virginia Woolf's statement still echo in the twenty-first century? - Why have women been consistently denied opportunities that are automatically given to men? - And why has the historical record failed to adequately recognize notable women? *Anonymous Is a Woman*. . .exposes the roots and manifestations of institutionalized gender discrimination; dismantles centuries of historical bias through biographical profiles of fifty remarkable, yet forgotten women innovators; and challenges ingrained stereotypical assumptions to advance an unconventional argument for equality and inclusivity. 100% of all proceeds from the sale of the book go to charitable organizations and institutions.

A fun and feminist look at forgotten women in science, technology, and beyond, from the bestselling author of *THE FANGIRL'S GUIDE TO THE GALAXY* You may think you know women's history pretty well. But have you ever heard of. . . · Alice Ball, the chemist who developed an effective treatment for leprosy—only to have the credit taken by a man? · Mary Sherman Morgan, the rocket scientist whose liquid fuel compounds blasted the first U.S. satellite into orbit? · Huang Daopo, the inventor whose weaving technology revolutionized textile production in China—centuries before the cotton gin? Smart women have always been able to achieve amazing things, even when the odds were stacked against them. In *Wonder Women*, author Sam Maggs tells the stories of the brilliant, brainy, and totally rad women in history who broke barriers as scientists, engineers, mathematicians, adventurers, and

Access Free Female Innovators At Work Women On Top Of Tech

inventors. Plus, interviews with real-life women in STEM careers, an extensive bibliography, and a guide to women-centric science and technology organizations—all to show the many ways the geeky girls of today can help to build the future. Table of Contents: Women of Science Women of Medicine Women of Espionage Women of Innovation Women of Adventure

"[A] solid contribution to the growing popular literature on the subject."—PUBLISHERS WEEKLY From one of Time Magazine's "Forty Most Influential Minds in Technology" comes an essential collection of candid, first-hand accounts of women in technology. Women in technology are on the rise in both power and numbers, and now it's more important than ever to not lose that momentum, to "lean in" and close the gender gap. Although they make up half of the population, only 14% of engineers in the United States are women. They take the seeds of technological advancement and build something life-changing, potentially life-saving. The future of technology depends on the full and active participation of women and men working together, and it is vital that women are both educated and encouraged to go into the tech sectors. Hailed by Foreign Policy Magazine as a "Top 100 Global Thinker," professor, researcher, and entrepreneur Vivek Wadhwa, alongside award-winning journalist Farai Chideya, set out to collect anecdotes and essays from global leaders, sharing how their experiences in innovative industries frame the future of entrepreneurship. With interviews and essays from hundreds of women in STEM fields, including Anousheh Ansari the first female private sector space explorer, former Google[X] VP and current CTO of the USA Megan Smith, Ory Okolloh of the Omidyar Network, venture capitalist Heidi Roizen and CEO of Nanobiosym Dr. Anita Goel, MD, PhD, *Innovating Women* offers perspectives on the challenges that women

Access Free Female Innovators At Work Women On Top Of Tech

face, the strategies that they employ in the workplace, and how an organization can succeed or fail in its attempts to support the career advancement of women.

This updated edition of the bestselling *Girls Think of Everything*, by Sibert-winner Catherine Thimmesh and Caldecott Honor winner Melissa Sweet, retains all the integrity of the original but includes expanded coverage of inventions (and inventors) to better reflect our diverse and technological world. In kitchens and living rooms, in garages and labs and basements, even in converted chicken coops, women and girls have invented ingenious innovations that have made our lives simpler and better. What inspired these girls, and just how did they turn their ideas into realities? Retaining reader-tested favorite inventions, this updated edition of the best-selling *Girls Think of Everything* features seven new chapters that better represent our diverse and increasingly technological world, offering readers stories about inventions that are full of hope and vitality--empowering them to think big, especially in the face of adversity.

Profiles geologist Florence Bascom, geneticist Barbara McClintock, computer pioneer Admiral Grace Hopper, environmentalist Rachel Carson, Nobel prize-winning physicist Rosalind Yalow, and other twentieth-century American scientists.
