The ninth edition of Finite Mathematics for Business, Economics, Life Sciences, and Social Sciences is designed for a one-term course in finite mathematics and for students who have had 1 1/2 - 2 years of high school algebra or the equivalent. The choice and independence of topics make the text readily adaptable to a variety of courses (see the Chapter Dependency Chart on page xi).

This book covers mathematics of finance, linear algebra, linear programming, probability, and descriptive statistics, with an emphasis on cross-discipline principles and practices. Designed to be reader-friendly and accessible, it develops a thorough, functional understanding of mathematical concepts in preparation for their application in other areas. Each chapter concentrates on developing concepts and ideas followed immediately by developing computational skills and problem solving. Two-part coverage presents a library of elementary functions and finite mathematics. For individuals looking for a view of mathematical ideas and processes, and an illustration of the relevance of mathematics to the real world. Illustrates relevance of mathematics to the real world.
