An optical fiber is a thin fiber of glass or plastic that can carry light from one end to the other.

The study of optical fibers is called fiber optics, which is part of applied science and engineering. Optical fibers are mainly used in telecommunications, but they are also used for

Download Free Free Fibre Optic

lighting, sensors, toys, and special cameras for seeing inside small spaces. They are sometimes used in medicine to see inside people, like down their throat.

~~Optical fiber—Simple English Wikipedia, the free ...~~

An optical fiber is a flexible, transparent

Download Free Free Fibre Optic

fiber made by drawing glass or plastic to a diameter slightly thicker than that of a human hair. Optical fibers are used most often as a means to transmit light between the two ends of the fiber and find wide usage in fiber-optic communications, where they permit transmission over longer distances and at higher
