*Management Challenges in the 21st Century* looks afresh at the future of management thinking and practice. The content revolves around two fundamental issues that are occurring simultaneously: changes in the world economy, and shifts in the practice of management. These developments, especially in developed countries are crucial in exploring and understanding the challenges of the future. This volume focuses on the key questions for all business: What are the new realities? What new policies are required of companies and executives in order to deal with these changes. Facing a whole swathe of issues head-on in his usual clear-sighted style, Drucker offers up a prescient and informed analysis that will help every executive to build a proactive strategy for the future.

A fresh, personal, and entertaining exploration of a topic that concerns all of us: how to be more productive at work and in every facet of our lives. Chris Bailey turned down lucrative job offers to pursue a lifelong dream--to spend a year performing a deep dive experiment into the pursuit of productivity, a subject he had been enamored with since he was a teenager. After obtaining his business degree, he created a blog to chronicle a year-long series of productivity experiments he conducted on himself, where he also continued his research and interviews with some of the world's foremost experts, from Charles Duhigg to David Allen. Among the

experiments that he tackled: Bailey went several weeks with getting by on little to no sleep; he cut out caffeine and sugar; he lived in total isolation for 10 days; he used his smartphone for just an hour a day for three months; he gained ten pounds of muscle mass; he stretched his work week to 90 hours; a late riser, he got up at 5:30 every morning for three months—all the while monitoring the impact of his experiments on the quality and quantity of his work. The Productivity Project—and the lessons Chris learned—are the result of that year-long journey. Among the counterintuitive insights Chris Bailey will teach you:

- slowing down to work more deliberately;
- shrinking or eliminating the unimportant;
- the rule of three;
- striving for imperfection;
- scheduling less time for important tasks;
- the 20 second rule to distract yourself from the inevitable distractions;
- and the concept of productive procrastination.

In an eye-opening and thoroughly engaging read, Bailey offers a treasure trove of insights and over 25 best practices that will help you accomplish more.

The book is divided into several sections covering Warren Buffett's personal business management:

- **Managing one's life** - focuses on Buffett's insistence on a good education, picking one's heroes early in life, and staying away from things that damage you personally. The authors also discuss Buffett's belief that challenges make life interesting.
- **Managing One's Career** - Buffett believes that you should work at something that you are passionate about. Do what you like and you will find a way to make money. Do what you hate and you will be miserable even if you are rich.
- **Managing Employees** - place honesty on the same level as intelligence as a managerial attribute. How to keep managers inspired and working hard.
- **Managing the Business** - Buffett has learned that companies that have a durable competitive advantage over their competitors consistently earn more money year after year and are the easiest to manage.
- **Managing of Personal Money** - discover the simple rules that Buffett uses for buying other businesses and how he has incorporated them into his own personal investment style.

Post-Capitalist Society provides an analysis of the transformation of the world into a post-capitalist society. This transformation, which will not be completed until 2010 or 2020, has already changed the political, economic, social, and moral landscape of the world. The book reviews and revises the social, economic, and political history of the Age of Capitalism and of the nation state. It argues that the real and controlling resource and the absolutely decisive 'factor of production' is neither capital, nor land, nor labor. It is knowledge. Instead of capitalists and proletarians, the classes of the post-capitalist society are knowledge workers and service workers. This book covers a wide range of topics, dealing with post-capitalist society; with post-capitalist polity; and with new challenges to knowledge itself. The focus is on the developed countries—on Europe, on the United States and Canada, on Japan and the newly developed countries on the mainland of Asia, rather than on the developing countries of the Third World. The areas of discussion—Society, Polity, and Knowledge—are arrayed in order of predictability.

In his sixty-five-year consulting career, Peter F. Drucker, widely regarded as the father of modern management, identified eight practices that can make any executive effective. Leadership is not about charisma or extroversion. It's about these practices: Effective executives ask, "What needs to be done?" They also ask, "What is right for the enterprise?" They develop action plans. They take responsibility for decisions. They take responsibility for communicating. They focus on opportunities rather than problems. They run productive meetings. And they think and say "we" rather than "I." Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape
