Constitutions can play a central role in responding to environmental challenges, such as pollution, biodiversity loss, lack of drinking water, and climate change. The vast majority of people on earth live under constitutional systems that protect the environment or recognize environmental rights. Such environmental constitutionalism, however, falls short without effective implementation by policymakers, advocates and jurists. Implementing Environmental Constitutionalism: Current Global Challenges explains and explores this 'implementation gap'. This collection is both broad and deep. While some of the essays analyze crosscutting themes, such as climate change and the need for rule of law that affect the implementation of environmental constitutionalism throughout the world, others delve deeply into geographically contextual experiences for lessons about how constitutional environmental law might be more effectively implemented. This volume informs global conversations about whether and how environmental constitutionalism can be made more effective to protect the natural environment.

As the "Giant of Africa" Nigeria is home to about twenty percent of the population of Sub-Saharan Africa, serves as Africa's largest producer of oil and natural gas, comprises Africa's largest economy, and represents the cultural center of African literature, film, and music. Yet the country is plagued by problems that keep it from realizing its potential as a world power. Boko Haram, a radical Islamist insurrection centered in the northeast of the country, is an ongoing security challenge, as is the continuous unrest in the Niger Delta, the heartland of Nigeria's petroleum wealth. There is also persistent violence associated with land and water use, ethnicity, and religion. In Nigeria: What Everyone Needs to Know®, John Campbell and Matthew Page provide a rich contemporary overview of this crucial African country. Delving into Nigeria's recent history, politics, and culture, this volume tackles essential questions related to widening inequality, the historic 2015 presidential election, the persistent security threat of Boko Haram, rampant government corruption, human rights concerns, and the continual conflicts that arise in a country that is roughly half Christian and half Muslim. With its continent-wide influence in a host of areas, Nigeria's success as a democracy is in the fundamental interest of its African neighbors, the United States, and the international community. This book will provide interested readers with an accessible, one-of-a-kind overview of the country.

This book examines public oath taking as an anti-corruption strategy that has been implemented with successful results in Nigeria and that has applications for other countries struggling with similar problems. The author of the book is the founder of Association of Nigerians against Corruption (ANAC), the NGO that first piloted the oath taking program—in which people swear publicly not to either take or receive bribes. Drawing on the experiences of the program and interviews with a number of ANAC participants, the author sheds light on some of the dynamics that underlie corruption, the potential of oath taking, and the importance of grassroots efforts and individual moral agency as forces of change.

Africa finds itself at the centre stage of world politics in the twenty-first century. To truly determine its rising influence and role in world affairs would mean unravelling the politics of imperialism, the Cold War and globalisation. Going beyond Euro-American perspectives, this book presents a comprehensive study of Africa and its role in world politics. Africa in World Affairs:
• Closely examines the transition of Africa in its colonial and post-colonial phases;
• Explores the intellectual history of modern Africa through liberation struggles, social movements, leaders and thinkers;
• Investigates the continent ' s relationships with former colonial powers such as Britain, France and Portugal; untangles complexities of French neo-colonialism and sheds light on the role of the superpower, such as the USA and major and rising powers like China and India;
• Highlights complex and wide-ranging diversities of the region, and the ways in which it continues to negotiate with issues of modernity, racism and globalisation. A core text on Africa and the world, this book will be indispensable for students of African studies, politics and international relations, and history. It will also be a must-read for policymakers, diplomats and government think tanks.

This volume critically engages with the phenomenon of civil militias in Africa, especially the nature of threats and challenges they pose to national and human security. It questions why the African political scene is increasingly inundated with the activities of civil militias, examines the socio-political and economic conditions that trigger and/or encourage and sustain the operations of civil militias, and investigates the dominant motivations of African civil militias. In the face of this complex security emergency, the volume conceptualizes and theorizes the phenomenon of civil militias; focuses the academic debate and policy on the links between civil militias and the growing cycle of state failure, instability, collapse and fragmentation in Africa; broadly and critically explores and expounds the short-term security consequences of the operations of civil militias; and articulates a corpus of policy-relevant knowledge. The book is ideally suited to courses on African studies, security and peace studies and military studies but would also be of interest to practitioners.

Effective Leadership In Nigeria: Practical Ways To Build an Effective, Inspiring, Transformational and Visionary Leadership and Governance in Nigeria is mostly based on the current apathetic and virtual lack of effective and visionary leadership situation in contemporary Nigeria and distills the golden gems: - principles, processes, procedures and practical applications inherent in effective, inspiring, visionary and enthusiastic leadership. It attempts at instituting, building and encouraging good, effective, and visionary leadership in the nation and that is currently, virtually lacking. From the outset, the author makes it clear that this writing is not designed to model or fit any known leadership paradigm, theory or management style. Rather, based on relevant research on leadership as it impacts the Nigerian situation, the book attempts to explore what it takes for there to be an effective and good leadership to successfully lead and change Nigeria for the better. The book is written and organized in a way that reflects and captures the contemporary experiences, frustrations, psychological emotions, aspirations and hopes of every Nigerian and perhaps of promising politicians and future leaders who are honestly touched by the virtual vacuum of real and effective leadership in the country, their concerns, questions, dreams, and the expectations that have virtually gone unmet in the past more than half a century. Properly elucidating what leadership means, and differentiating it from rulership this book couldn't have come at a better time to assist Nigeria's leadership-struggles! A masterpiece, Dr. Nkwocha has taken the current apathetic leadership lull and almost leadership void in the nation and set the leadership principles and processes on the cutting edge. The book is a definitive guide to anyone aspiring to the leadership of Nigeria and is therefore in search of meaningful leadership, its principles, processes and pragmatic applications. The book is a must read!

This book considers the legal control of multinational corporations (MNCs) for violations of human rights from a developing country ' s perspective, examining the role for corporate social responsibility (CSR) in regulating the conduct of MNCs. The book uses the case study of Nigeria which is host to major MNCs from the EU and the US, to show that the CSR concept is currently insufficient to deal with externalities emanating from MNCs ' operations including human rights violations. The book goes on to argue that whilst control of MNCs involves regulation at the international level, more emphasis needs to be placed on possibilities at home States and host States where there are stronger bases for the control of corporations. It examines possibilities in the European Union, exploring ways in which the EU can ensure that MNCs from its territory do not violate human rights when operating abroad.
