Also released was the TD4_e package, meant to improve fuel economy and reduce emissions. It boasted a stop-start feature where the engine would turn off when the vehicle stopped, and then start again when needed. To reduce stress on the engine when stopping and starting, the TD4_e featured regenerative braking, which stored power to later assist in the process. In 2011 the Freelander was also ...

In autumn 2000, a revised range was launched, with an all-new Td4 diesel engine and a top-line V6. Minor interior and exterior improvements were included into a revised range structure of S, GS and ES. In late 2003 the Freelander was comprehensively updated. There was a completely revised interior (by far the old car's weakest link) and
