The German cavalry - the fierce lancers known as Uhlans, in their distinctive spiked 'Pickelhaube' helmets, - struck terror into the hearts of the terrified civilian populations of Belgium and France as they struck deep into the heart of Flanders, ranging far ahead of the main advance of the German armies in August 1914. The Uhlans acted as scouts - the eyes and ears of the army - and in the days before air warfare and the formation of the trench lines developed, these cavalymen were an invaluable part of the army's intelligence, although in many senses the 1914 campaign was the cavalry's last hurrah before the mechanised warfare of the 20th century took hold and made mounted warfare obsolete. This fascinating book tells the story of the German cavalry's role in that summer campaign. Written by an author who as a Lieutenant General and Inspector of Cavalry was an authority on his subject, it gives a minutely detailed day by day, almost minute by minute account of the campaign and will be of interest to anyone fascinated by the Great War in general, and by the history of cavalry warfare in particular.

If wars were wagered on like pro sports or horse races, the Germany military in August 1914 would have been a clear front-runner, with a century-long record of impressive victories and a general staff the envy of its rivals. Germany's overall failure in the first year of World War I was surprising and remains a frequent subject of analysis, mostly focused on deficiencies in strategy and policy. But there were institutional weaknesses as well. This book examines the structural failures that frustrated the Germans in the war's crucial initial campaign, the invasion of Belgium. Too much routine in planning, command and execution led to groupthink, inflexibility and to an overconfident belief that nothing could go too terribly wrong. As a result, decisive operation became dicey, with consequences that Germany's military could not overcome in four long years.

In 1914 Swedish professor, writer, illustrator and adventurer Sven Hedin was granted a car and escort and given a comprehensive tour of the German Armies fighting in Belgium and France during September and October 1914. Hedin was given unfettered access to German armies and leadership. The resulting book, *With the German Armies in the West*, was quickly finished and published, originally in Swedish, in 1914 then swiftly translated and printed in early 1915 by John Lane of The Bodley Head Press, London, at a time when the events described in the book were still fresh.??During his battle-front tour, Hedin took the opportunity to roam around the Army's rear areas and to visit the frontline trench network. The Battle of the Silver Helmets was an engagement orchestrated according to the previous successes of the cavalry of Frederick the Great. It was staged so that the magnificently equipped and trained German Fourth Cavalry Division would charge into glory, sabres rattling; instead, 24 German officers, 468 men, and 843 horses were lost during the eight separate charges conducted that day. The entire right wing of the Imperial German Army consisted of only nine cavalry brigades in the Schlieffen Plan, and in the battle of 12 August 1914, two of these brigades were catastrophically beaten. This battle has not yet been explored in the English language because it took place before the British Expeditionary Force (BEF) landed in the Channel ports and well before any American involvement. British historians have also generally focused on Germany's efforts to enter Belgium through the forts at Liège, which are east of

Halen. However, the Battle of the Silver Helmets so impacted century-old cavalry tradition that large-scale charges would never again be attempted on the Western Front. Thoroughly researched and hugely revelatory, *The Last Great Cavalry Charge* is a blow-by-blow account of the moment that the cavalry went from a prestigious, pivotal role in German Army tactics to obsolescence in the face of newly mechanised infantry. It provides essential and moving insight into the wider socio-cultural repercussions of technical military innovations in the First World War.
