Since the Middle Ages, lexographies of Talmudic and other rabbinic literature have combined in one entry Babylonian, Palestinian, and Targumic words from various periods. Because morphologically identical words in even closely related dialects can frequently differ in both meaning and nuance, their consolidation into one dictionary entry is often misleading. Scholars now realize the need to treat each dialect separately, and in *A Dictionary of Jewish Palestinian Aramaic*, Michael Sokoloff provides a complete lexicon of the dialect spoken and written by Jews in Palestine during the Byzantine period, from the third century C.E. to the tenth century. Sokoloff draws on a wide range of sources, from inscriptions discovered in the remains of synagogues and on amulets, fragments of letters and other documents, poems, and marginal notations to local Targumim, the Palestinian Midrashim and Talmud, texts addressing religious law (halacha), and Palestinian marriage documents (ketubbot) from the Arabic period. Many of these sources were unavailable to previous lexographers, who based their dictionaries on corrupt nineteenth-century editions of the rabbinic literature. The discovery of new manuscripts in both European libraries and the Cairo Geniza over the course of the twentieth century has revolutionized the textual basis of Jewish Palestinian Aramaic. Each entry in *A Dictionary of Jewish Palestinian Aramaic* is divided into six parts: lemma or root, part of speech, English gloss, etymology, semantic features, and bibliographic references. Sokoloff also includes an index of all cited passages. This major reference work, updated to reflect the publication of new texts over the last decade, will both provide students and scholars with a tool for an accurate understanding of the Aramaic dialect of Jewish Palestinian literature of the Byzantine period and help Aramaic and Semitic linguists to see the relationship between this dialect and others, especially the contemporary dialects of Palestine.

Marriage today might be a highly contested topic, but certainly no more than it was in antiquity. Ancient Jews, like their non-Jewish neighbors, grappled with what have become perennial issues of marriage, from its idealistic definitions to its many practical forms to questions of who should or should not wed. In this book, Michael Satlow offers the first in-depth synthetic study of Jewish marriage in antiquity, from ca. 500 B.C.E. to 614 C.E. Placing Jewish marriage in its cultural milieu, Satlow investigates whether there was anything essentially "Jewish" about the institution as it was discussed and practiced. Moreover, he considers the social and economic aspects of marriage as both a personal relationship and a religious bond, and explores how the Jews of antiquity negotiated the gap between marital realities and their ideals. Focusing on the various experiences of Jews throughout the Mediterranean basin and in Babylonia, Satlow argues that different communities, even rabbinic ones, constructed their own "Jewish" marriage: they read their received traditions and rituals through the lens of a basic understanding of marriage that they shared with their non-Jewish neighbors. He also maintains that Jews idealized marriage in a way that responded to the ideals of their respective societies, mediating between such values as honor and the far messier realities of marital life. Employing Jewish and non-Jewish literary texts, papyri, inscriptions, and material artifacts, Satlow paints a vibrant portrait of ancient Judaism while sharpening and clarifying present discussions on modern marriage for Jews and non-Jews alike.
