AP POGIL- Global Climate Change.pdf Global climate change is a topic that is frequently discussed but often misunderstood due to the complexi- ties of studying and predicting our Earth's climate, the human impact on it, and the long-term effects of it. Making sense of complex graphs and data as well as discerning the validity of the data are important skills in climate literacy. This activity will explore the evidence that scientists have collected to support global climate change.

Global Climate Change - Conmack Schools Global Climate Change. Paul Andersen explains how the climate on the earth is affected by the amount of solar radiation and the greenhouse affect. The addition of anthropogenic greenhouse gases has led to global warming which is impacting humans on the planet. A discussion of the greenhouse effect and greenhouse gases (including water vapor, carbon dioxide, methane, nitrous oxide, and CFCs) is included.

AP ES-034 Global Climate Change — bozemanscience Scientists have noted marked changes that have altered global weather patterns. Collectively, these changes are called global climate change and include a worldwide increase in temperature due primarily to rising levels of atmospheric carbon dioxide. There are several causes of global climate change, including human activity.
