Few bands have as widespread global appeal as Iron Maiden. This up-to-date book showcases the band in all its beastly glory. Formed in 1975 by a young, East London bass player named Steve Harris, Iron Maiden went on to become one of the most successful heavy metal acts in history. With an estimated 85 million albums sold worldwide, the band remains hugely popular. Iron Maiden is the updated edition of the first-ever complete, illustrated retrospective of the band. Music journalist Neil Daniels relates the band's entire history and provides a complete, up-to-date discography, while respected heavy metal journalists and Iron Maiden experts, including Ian Christie, Martin Popoff, and Mick Wall, analyze the recordings. The stories behind the band's formation, roster changes, recordings through 2015's The Book of Souls, and tours through 2016 are complemented with nearly 500 images, including live performance and candid off-stage photographs, and memorabilia, including handbills, gig posters, backstage passes, buttons, ticket stubs, and, of course, Eddie, Iron Maiden's iconic Derek Riggs-created mascot. This new edition of Iron Maiden is required reading for any heavy metal fan. The book covers the compilation From Here to Eternity (2011); the CD/LP/DVD/Blu-ray release of En Vivo! (2012); the Maiden World Tour (2012-2014) to North America, Europe, and South America; The Book of Souls album (2015); and the 2016 tour.

In his first book, Journey to a Brave New World, author David Watts detailed how a small group of Satan-worshiping elites is following a multi-generational plan to manipulate humanity toward a vision outlined in Aldous Huxley's novel Brave New World. In this, the second book in his series, he provides further evidence of their intentions for the United States. He has spent six years considering history, scientific research, and declassified government documents to uncover evidence to support his thesis. He offers evidence to prove not only the existence of civilian inmate labor camps within the United States, but also the procedures that are already in place to activate them. Details of the continued build-up and expansion of the Department of Homeland Security in readiness for the planned war against the American people are provided as well. He identifies the Trojan Horse mechanism operating to bring down the United States from within and exposes the fact that Communist troops are to be used as a final clean-up to allow globalists to introduce their solution a one-world government. In Journey to a Brave New World, Part Two, Watts includes a forty-five-step plan that would enable the United States to regain its former glory and ensure that the globalists do not get their brave new world.

"This is the management book of the year. Clear, powerful and urgent, it's a must read for anyone who cares about where they work and how they work." --Seth Godin, author of This is Marketing "This book is a breath of fresh air. Read it now, and make sure your boss does too." --Adam Grant, New York Times bestselling author of Give and Take, Originals, and Option B with Sheryl Sandberg Aaron Dignan is the driver behind some of today's most agile, fastest-scaling companies. In this book, he reveals his tested strategies for eliminating red tape, dissolving bureaucracy, and doing the best work of your life. He's found that nearly everyone, from Wall Street to Silicon Valley, points to the same frustrations: lack of trust, bottlenecks in decision making, siloed functions and teams, meeting and email overload, tiresome budgeting, short-term thinking, and more. Is there any hope for a solution? Haven't countless business gurus promised the answer, yet changed almost nothing about the way we work? That's because we fail to recognize that organizations aren't machines to be predicted and controlled. They're complex human systems full of potential waiting to be released. Dignan says you can't fix a team, department, or organization by tinkering around the edges. Over the years, he has helped his clients completely reinvent their operating systems--the fundamental principles and practices that shape their culture--with extraordinary success. Imagine a bank that abandoned traditional budgeting, only to outperform its competition for decades. An appliance manufacturer that divided itself into 2,000 autonomous teams, resulting not in chaos but rapid growth. A healthcare provider with an HQ of just 50 people supporting over 14,000 people in the field--that is named the "best place to work" year after year.. And even a team that saved \$3 million per year by cancelling one monthly meeting. Their stories may sound improbable, but in Brave New Work you'll learn exactly how they and other organizations are inventing a smarter, healthier, and more effective way to work. Not through top down mandates, but through a groundswell of autonomy, trust, and transparency. Whether you lead a team of ten or ten thousand, improving your operating system is the single most powerful thing you can do. The only question is, are you ready?

"In the next decade and a half, China and India will become two of the world's indispensable powers--whether they rise peacefully or not. During that time, Asia will surpass the combined strength of North America and Europe in economic might, population size, and military spending. Both India and China will have vetoes over many international decisions, from climate change to global trade, human rights, and business standards. From her front row view of this colossal shift, first at the State Department and now as an advisor to American business leaders, Anja Manuel escorts the reader on an intimate tour of the corridors of power in Delhi and Beijing. Her encounters with political and business leaders reveal how each country's history and politics influences their conduct today. Through vibrant stories, she reveals how each country is working to surmount enormous challenges--from the crushing poverty of Indian slum dwellers and Chinese factory workers, to outrageous corruption scandals, rotting rivers, unbreathable air, and managing their citizens' discontent. We write our hands about China, Manuel writes, while we underestimate India, which will be the most important country outside the West to shape China's rise. Manuel shows us that a different path is possible--we can bring China and India along as partners rather than alienating one or both, and thus extend our own leadership in the world"--

U.S.A.F. Chief of Staff 2013 Professional Reading List Selection Nearly forty years passed between the Apollo moon landings, the grandest accomplishment of a government-run space program, and the Ansari X PRIZE-winning flights of SpaceShipOne, the greatest achievement of a private space program. Now, as we hover on the threshold of commercial spaceflight, authors Chris Dubbs and Emeline Paat-Dahlstrom look back at how we got to this point. Their book traces the lives of the individuals who shared the dream that private individuals and private enterprise belong in space. Realizing Tomorrow provides a behind-the-scenes look at the visionaries, the crackpots, the financial schemes, the legal wrangling, the turf battles, and--underpinning the entire drama--the overwhelming desire of ordinary people to visit outer space.
