This book constitutes the strictly refereed post-conference proceedings of the 5th International Symposium on Graph Drawing, GD'97, held in Rome, Italy, in September 1997. The 33 revised full papers and 10 systems demonstrations presented were selected from 80 submissions. The topics covered include planarity, crossing theory, three dimensional representations, orthogonal representations ...

[Graph Drawing - 5th International Symposium, GD '97, Rome ...](#)

Graph drawing is an area of mathematics and computer science combining methods from geometric graph theory and information visualization to derive two-dimensional depictions of graphs arising from applications such as social network analysis, cartography, linguistics, and bioinformatics. A drawing of a graph or network diagram is a pictorial representation of the vertices and edges of a graph ...

carefully reviewed and selected from 88 submissions. Furthermore, the proceedings contain the abstracts of two invited talks and to ...

Graph Drawing: 19th International Symposium, GD 2011 ...

At the heart of every good graph drawing algorithm lies an efficient procedure for assigning canvas positions to a graph ' s nodes and the bend points of its edges. However, every real-world implementation of such an algorithm must address numerous problems that have little to do with the actual algorithm, like handling input and output formats, formatting node texts, and styling nodes and ...
