To maintain the right amount of blood sugar, the body needs insulin, a hormone that delivers this sugar to the cells. When insulin is lacking, blood sugar builds up. We describe symptoms of high ...

High blood sugar: Symptoms, causes, and healthy levels

Blood pressure is created by the force of blood pushing against the walls of blood vessels (arteries) as it is pumped by the heart. The higher the pressure, the harder the heart has to pump. Normal adult blood pressure is defined as a blood pressure of 120 mm Hg 1 when the heart beats (systolic) and a blood pressure of 80 mm Hg when the heart ...

Noncommunicable diseases: Hypertension

Not to worry! All laboratory results need to be interpreted in the clinical context and the doctor who ordered the tests is usually in the best position to do that. Talk to the doctor who ordered the tests. Having said that, RBC count of 5.11 is not to be concerned about. You may take 2000 units of vitamin D3 daily to improve your vit D level.
