A child wanders too far into the Knysna Forest ... he never returns. Nine years later government officials working on a census find a white child living with a Coloured family in the mountains beyond the forest. They take him away from the stricken Fiela, who has brought him up as her son, and give him back to his 'original' family. Stunned and helpless, Benjamin waits for Fiela to reclaim him. But, powerless against authority, Fiela never comes. Benjamin has to grow up before he can go in search of the truth ...

The time for new approaches to White 's work is overdue. Central to the present study are Edward Said 's ideas about the role of the intellectual (and the writer) —of speaking " truth to power," and also the importance of tracing the " affiliations " of a text and its embeddedness in the world. This approach is not incompatible with Jung 's theory of the " great " artist and his capacity to answer the deep-seated psychic needs of his people. White 's work has contributed in many different ways to the writing of the nation. The spiritual needs of a young nation such as Australia must also comprehend its continual urge towards self-definition. Explored here is one important aspect of that challenge: white Australia 's dealings with the indigenous people of the land, tracing the significance of the Aboriginal presence in three texts selected from the oeuvre of Patrick White: Voss (1957), Riders in the Chariot (1961), and A Fringe of Leaves (1976). Each of these texts interrogates European culture 's denigration of the non-European Other as embedded in the discourse of orientalism. One central merit of White 's commanding perspective is the constant close attention he pays to European hubris and to the paramount autonomy of indigenous culture. There is evidence even of a project which can be articulated as a search for the possibility of white indigeneity, the potential for the white settler 's belonging within the land as does the indigene.

Poppie's contented childhood ends when she marries, moves to Cape Town and later is forced to resettle apart from her husband. The drama of the Soweto and Sharpeville uprisings are vividly portrayed.

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.
