The M-Series is the mainstay among industrial diesel engines. The 2, 3 and 4-cylinder engines have been successfully established on the market for around 30 years - and they are still regarded as unbeatable. The robust basic drive train, notably the sturdiest crankshaft of all engines on the market, has remained unchanged since the market introduction. Thus running times of several ten ...

140 years of experience. In its history of 140 years, Hatz has developed into being a specialist for diesel engines rated up to 83 hp. The basis of all corporate activities is the development and production of high-quality and rugged diesel engines.

Hatz Engines | Hatz Diesel of North America, Inc.

The anticipated requirements of the new EU Stage V emission level cannot be fulfilled by diesel engines with a power output of more than 19 kilowatts without diesel particulate filters. Hatz already took this path at an early stage in the development of the new H-series engine generation and is thus well prepared for the future.

The 2-cylinder engines 2M41 and 2L41C fulfil the standards if operated below 19kW. Over 19kW of power the engine will not be available anymore. EU 97/68 Stage IIIb. In contrast to the emissions standards of the EPA there are different emission levels for variable and constant speed engines in the EU. For engines which run on a constant speed there is an engine available for each of the Hatz ...
