The economic history of Japan is most studied for the spectacular social and economic growth in the 1800s after the Meiji Restoration. It became the first non-Western great power, and expanded after the Second World War. When Japan recovered from devastation to become the world's second largest economy behind the United States, and from 2010 behind China as well.

Economic history of Japan - Wikipedia

The country 's GDP grew year-on-year at a great pace in the immediate postwar decades, and so did the quality of exports. By the 1970s the Japanese economy was really taking off. And by the 1980s Japan was a preeminent global economic power with the world's second largest GDP. One might argue that Japan already had a reputation for craftsmanship.
