in increased

productivity and

profit. His results

caught the attention

of men of wealth who

were interested in

social reform. In

particular, at a similar

time, Jeremy Bentham was developing his own theories. Owen and Bentham seemed to be based on some similar ideas that the greatest happiness creates the greatest results. Their ideas developed against the backdrop of the Industrial Revolution, and growing social

and economic

problems in England.

Owen and Bentham

were forerunners of

highly relevant

current theories of

economics –

marginalism,

entrepreneurship,

personnel

management, and

constructivism. They

were acquainted with

such important

authors as James Mill,
Malthus, Ricardo and
John Stuart Mill.

However, their
economic theories
were ruled out by
classical economists,
who actively tried to
silence perspectives
different from the
orthodoxy. This book
presents an
innovative study of
these two social

thinkers and reformers, who have rarely, if ever, been studied together. This comparative study provides new context both on the social debate taking place during the Industrial Revolution, and on the development of modern social thought, in particular, the relationship

between socialism
and utilitarianism.

Economics,

Entrepreneurship and

Utopia will be of great

relevance to scholars

with an interest in the

history of economic

ideas, the history of

entrepreneurship, and

social reform in both

historical and

contemporary

contexts.
