Minor editing gripe I know, but when you're publishing the 9th edition of something, it's all about the polish. The next part, though, is the whole reason you buy the book. The vast majority of this tome is made up of table after table of loads for every caliber and powder combination you could want.

I have been told that .308  
brass can be resized and  
used for the .260 but  
according to my book  
(hornady 9th edition) the  
.308 brass is considerably  
shorter than the .260. Now  
that being said my once  
fired .260 brass is still  
shorter than the books case  
trim length.
