Nursed back to health by Arctic aborigines, a Canadian sailor finds his loyalties torn between his new people and the life he left behind—a novel full of "passion, strength, and beauty of a world we . . . have never understood" (Farley Mowat). John MacLennan, a Canadian sailor is left behind by his ship, stranded on the northeastern tip of Siberia. Having had his hands amputated, crippled with little hope of returning home, the Chukchi community decides to adopt this wounded stranger and teaches him to live as a true human being. From thinking of Chukchi as savages, John comes to know his new companions as real people who share the best and worst of human traits with his own kind. He begins to understand their community, respects them, and makes an effort to be accepted as one of them. Though crippled, John rises to the Chukchi view of a person. But how much longer will John commit to this newfound perspective when presented with the opportunity to return to his own past and family? Rytkeu's empathy, humor, and provocative voice guide us across the magnificent landscape of the North and reveal all the complexity and beauty of a vanishing world. *A Dream in Polar Fog* is at once a cross-cultural journey, an ethnographic chronicle of the people of Chukotka, and a politically and emotionally charged adventure story.

"Fascinating profiles" of remarkable nuns, from an eighty-three-year-old Ironman champion to a crusader against human trafficking (Daily News [New York]). "In an age of villainy, war and inequality, it makes sense that we need superheroes," writes Nicholas Kristof of The New York Times. "And after trying Superman, Batman and Spider-Man, we may have found the best superheroes yet: Nuns." In *If Nuns Ruled the World*, veteran reporter Jo Piazza overthrows the popular perception of nuns as killjoy schoolmarm, instead revealing them as the most vigorous catalysts of change in an otherwise repressive society. Meet Sister Simone Campbell, who traversed the United States challenging a Congressional budget that threatened to severely undermine the well-being of poor Americans; Sister Megan Rice, who is willing to spend the rest of her life in prison if it helps eliminate nuclear weapons; and the inimitable Sister Jeannine Gramick, who is fighting for acceptance of gays and lesbians in the Catholic Church. During a time when American nuns are often under attack from the very institution to which they devote their lives—and the values of the institution itself are hotly debated—these sisters offer thought-provoking and inspiring stories. As the Daily Beast put it, "Anybody looking to argue there is a place for Catholicism in the modern world should just stand on a street corner handing out Piazza's book."

The hilarious adventures of an elderly pony named Mr. Mendelson and his 2 piano-playing field mice friends In a wild, remote place called Midnight Park, there lives an elderly Orkney pony named Mr. Mendelson. He is only 3 feet tall, is black all over, and has a big, handsome head. For years, Mendelson has been ridden by Sam, who is now old enough to go away to boarding school. But before he leaves, Sam asks his grandfather to buy Mendelson a piano. Not for Mendelson, because everyone knows horses can't play the piano, but for Mendelson's friends Gertrude and Bertha—2 talented field mice who were taught to play by a musician who lives in the park. Delighted when the piano is placed under a large oak tree, the mice promise Mendelson a concert at 6 p.m. every night. With 7 enchanting tales, *Mice & Mendelson* takes readers into the rich world of these farmyard friends. In 1 story, the old pony gets a bad case of the hiccups. In another, he learns to tell time with the help of Gertrude and Bertha, who wind his watch every day. In further adventures, Mendelson saves the moon from drowning in the pond and the village Christmas trees from being stolen. But what Mendelson really wants is to learn how to fly, and surprisingly his wish almost comes true—no thanks to the wicked ways of the scheming gypsy Dan Sligo! This ebook features illustrations by Babette Cole and a personal history of Joan Aiken including rare images from the author's estate.

How much risk should we take? A Short Guide to Risk Appetite sets out to help all those who need to decide how much risk can be taken in a particular risky and important situation. David Hillson and Ruth Murray-Webster introduce the RARA Model to explain the complementary and central roles of Risk Appetite and Risk Attitude, and along the way they show how other risk-related concepts fit in. Risk thresholds are the external expression of inherent risk appetite, and the challenge is how to set the right thresholds. By progressively deconstructing the RARA Model, the authors show that the essential control step is our ability to choose an appropriate risk attitude. The book contains practical guidance to setting risk thresholds that take proper account of the influences of organisational risk culture and the individual risk preferences of key stakeholders. Alongside this, individuals and organisations need to choose the risk attitude that will optimise their chances of achieving the desired objectives.
