Whether we grow up with one, two, or several languages during our early years of life, many of us will learn a second, foreign, or heritage language in later years. The field of Second language acquisition (SLA, for short) investigates the human capacity to learn additional languages in late childhood, adolescence, or adulthood, after the first language --in the case of monolinguals-- or languages --in the case of bilinguals-- have already been acquired. Understanding Second Language Acquisition offers a wide-encompassing survey of this burgeoning field,

Teachers  
Children learn languages quickly and easily while adults are ineffective in comparison -- A true bilingual is someone who speaks two languages perfectly -- You can acquire a language simply through listening or reading -- Practice makes perfect -- Language students learn (and retain) what they are taught -- Language learners always benefit from correction -- Individual differences are a major, perhaps the major, factor in SLA -- Language acquisition is the individual acquisition of grammar.
