We hear a lot about "Flipping Houses" these days and there are all kinds of shows on television about it, but can it be as easy as it looks? Flipping a house is when a real estate investor (the buyer) buys a home that is in foreclosure, really cheap or usually at an auction, fixes it up and resells the house at a great profit! There is a ton of money to be made in house flipping but beware. You need to put the effort into educating yourself before you begin because a few common mistakes can cost you big time! Today's market is ripe for house flipping and with some hard work, knowledge and a little luck there is a fortune to be made in this market. So let us take a look at how this all works.

This book is a bio-cultural examination of John William Heisman, his times, and his many contributions to the development of intercollegiate football in America. In singling out his many contributions to the development of football (in particular, his championing of the forward pass), this book not only tells the story of Heisman's life but also reveals him in relationship to his time. This is the story of how an indigenous American public ritual--the Big Game--came about and how college football developed into the complex, problematic, and highly structured big business that it is today.

Big Ten football fans pack gridiron cathedrals that hold up to 100,000 spectators. The conference's fourteen member schools share a broadcast network and a 2016 media deal worth \$2.64 billion. This cultural and financial colossus grew out of a modest 1895 meeting that focused on football's brutality

and encroaching professionalism in the game. Winton U. Solberg explores the relationship between higher education and collegiate football in the Big Ten's first fifty years. This formative era saw debates over eligibility and amateurism roil the sport. In particular, faculty concerned with academics clashed with coaches, university presidents, and others who played to win. Solberg follows the conference's successful early efforts to put the best interests of institutions and athletes first. Yet, as he shows, commercial concerns undid such work after World War I as sports increasingly eclipsed academics. By the 1940s, the Big Ten's impact on American sports was undeniable. It had shaped the development of intercollegiate athletics and college football nationwide while serving as a model for other athletic conferences.

Between the World Wars, New Orleans transformed its image from that of a corrupt and sullied port of call into that of a national tourist destination. Anthony J. Stanonis tells how boosters and politicians reinvented the city to build a modern mass tourism industry and, along the way, fundamentally changed the city's cultural, economic, racial, and gender structure. Stanonis looks at the importance of urban development, historic preservation, taxation strategies, and convention marketing to New Orleans' makeover and chronicles the city's efforts to domesticate its jazz scene, "democratize" Mardi Gras, and stereotype local blacks into docile, servile roles. He also looks at depictions of the city in literature and film and gauges the impact on New Orleans of white middle-class America's growing prosperity, mobility, leisure time, and tolerance of women in public spaces once considered off-limits. Visitors go to New Orleans with expectations rooted in the city's "past": to revel with Mardi Gras maskers, soak up the romance of the French Quarter, and indulge in rich cuisine and hot music. Such a past has a basis in history, says Stanonis, but it has been carefully excised from its gritty context and scrubbed clean for mass consumption.
