5 Day Memory Mastery: Learn To Memorize Anything With Ease ...

Our brains like to remember things that are memorable. Numbers, dates, and vocabulary words aren't usually too memorable in and of themselves. So the key to making anything easier to remember is simply to make it memorable. Duh, right? Most people would have trouble remembering the number 3594. It's nothing special in and of itself.

A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book A Mind for Numbers A Mind for Numbers and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: ☐ Why sometimes letting your mind wander is an important part of the learning process ☐ How to avoid "rut think" in order to think outside the box ☐ Why having a poor memory can be a good thing ☐ The value of metaphors in developing understanding ☐ A simple, yet powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

Forget the 10,000 hour rule☐ what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills☐time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a

new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition—how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

“Highly entertaining.” —Adam Gopnik, *The New Yorker* “Funny, curious, erudite, and full of useful details about ancient techniques of training memory.” —*The Boston Globe* The blockbuster phenomenon that charts an amazing journey of the mind while revolutionizing our concept of memory An instant bestseller that is poised to become a classic, *Moonwalking with Einstein* recounts Joshua Foer's yearlong quest to improve his memory under the tutelage of top “mental athletes.” He draws on cutting-edge research, a surprising cultural history of remembering, and venerable tricks of the mentalist's trade to transform our understanding of human memory. From the United States Memory Championship to deep within the author's own mind, this is an electrifying work of journalism that reminds us that, in every way that matters, we are the sum of our memories.

Develop the power to learn and master any skill. Do you dream of excelling at a sport, music, art, cooking, writing, public speaking, or anything else? Learn, Improve, Master will help you make that dream a reality. Through a combination of learning science and strategies used by world-class performers, this guide will teach you what it really takes to master a skill (no, it isn't talent or 10,000 hours). You will learn HOW TO: Use your memory like top memory champions and remember anything you want Optimize practice like elite musicians, chess players, and athletes Build training habits that stick Overcome obstacles, setbacks, and plateaus Choose mentors and coaches that will help you develop your potential Accelerate learning and become a master of your craft Featuring examples and words of wisdom from Leonardo da Vinci, Usain Bolt, Ernest Hemingway, Michael Jordan, Garry Kasparov, Simone Biles, Stephen King, Michael Phelps, Martha Graham, Tiger Woods, Jiro Ono, Serena Williams, and many more.
