Attrition in the Engineering disciplines at all Universities is a huge problem. This text, in its first edition, promised to educate all interested in the Engineering area as a whole. Educators and students bought this book because of their great interest in seeing engineers thrive and made it wildly successful. In this edition more information about engineering careers and the discipline generally is to be included. This practical approach is edging out the voluminous, traditional introduction to engineering books. In this second edition of The Engineering Student Survival Guide, Chapter 2 has been heavily revised with a completely new section entitled, "Ten Tricks of the Old-Timers (Upperclassmen)". Much of the information pertaining to the time before a freshman's first class begins has been deleted. This book is part of the B.E.S.T. (Basic Engineering Series and Tools) Series, which consists of modularized textbooks offering virtually every topic and specialty likely to be of interest to engineers. All the texts boast distinguished authors and the most current content. The goal of this series is to provide the educational community with material that is timely, affordable, of high quality, and flexible in how it is used.

Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding.

Designing with Grasses shows gardeners not just what grasses are available, but how to design with grasses in different settings, including meadows, lawns, green roofs, and more. Design ideas are supported by carefully devised maintenance techniques, design checklists that make designing achievable by gardeners of all ability levels, and lists of grasses best for a variety of situations, including low-maintenance, drought-tolerant alternatives to the traditional lawn grasses and grasses suitable for green roofs and erosion control. An encyclopedic A to Z of grasses includes profiles with information on growth and care.

The Pacific Northwest Berry Book combines the updated and revised information of a field guide and the fun of a cookbook. Learn to identify 15 berry and fruit species using non-technical descriptions, habitat hints, and color photos.

Learn how to heal yourself and your animals with Reiki meditation. Reiki is a system of spiritual practice which uses meditation and compassion as keys to unlock healing potential. Sharing meditation with animals can help guide us toward being better people and creating a healthier planet, one where people nurture wellness through the practice of peace and a life of joyful service to others. Considered by many to be the world's premier animal Reiki expert, author Kathleen Prasad shares over thirty of her favorite meditations in this special book. Everything Animal Reiki will guide readers with: an introduction to the system of Reiki as a meditative practice, how to meditate with animals and their people, grounding meditations, expansion meditations, connection meditations, affirmation meditations and helpful articles illuminating different aspects of animal Reiki practice.

Learn to identify the firearms, evaluate their condition and determine value. The Gun Digest Book of Modern Gun Values features detailed specifications and current values from specialized experts for domestic and imported handguns, rifles, shotguns and commemorative firearms. 25,000 gun values 8,500 different guns 4,000 photos

Expanded, Second Edition

Engine-tuning expert A. Graham Bell steers you through the various modifications that can be made to coax maximum useable power output and mechanical reliability from your two-stroke. Fully revised with the latest information on all areas of engine operation, from air and fuel, through carburation, ignition, cylinders, porting, reed and rotary valves, and exhaust systems to cooling and lubrication, dyno tuning and gearing.
