The Art of Mopar: Chrysler, Dodge, and Plymouth Muscle Cars is the ultimate portrayal of history's ultimate muscle cars. This is the ultimate visual history of greatest muscle cars. The history of Chrysler Corporation is, in many ways, a history of a company floundering from one financial crisis to the next. While that has given shareholders fits for nearly a century, it has also motivated the Pentastar company to create some of the most outrageous, and collectible, cars ever built in the United States. From the moment Chrysler unleashed the Firepower hemi V-8 engine on the world for the 1951 model year, they had been cranking out the most powerful engines on the market. Because the company pioneered the use of lightweight unibody technology, it had the stiffest, lightest bodies in which to put those most powerful engines, and that is the basic muscle-car formula: add one powerful engine to one light car. When the muscle car era exploded onto the scene, Chrysler unleashed the mighty Mopar muscle cars, the Dodges and Plymouths that defined the era. Fabled nameplates like Charger, Road Runner, Super Bee, 'Cuda, and Challenger defined the era and rank

Expanded for the occasion of ZZ Top's 50th anniversary, Billy F Gibbons: Rock + Roll Gearhead throws wide Gibbons' garage and studio doors for an exclusive look at his exquisite collection of cars and guitars. Love cars, guitars, and ZZ Top? This visually stunning tour through this Grade-A Texas gearhead's weird, wild life, vintage and way-out custom guitars, and influential hot rods and custom cars is mandatory education. From the near-mythical '59 Les Paul sunburst known as "Pearly Gates" and the "Furry One" of MTV renown to cars like the Eliminator, CadZZilla, and Kopperhed, they're all here—more than 60 guitars and 15 astounding vehicles, all expounded upon by BFG himself and shown in commissioned color and artistic black-and-white photography. Cars and guitars that have made their way to light since the book's first publication in 2005 are included: Cars: Mexican Blackbird 1958 Thunderbird Quintana '50 Ford Custom El Camino Grocery-Getter custom Whiskey Runner '34 Ford Coupe '51 Willys Wagon Guitars: Party Peelers John Bolin Customs Neiman Marcus BFG SG Nacho Telecaster John Bolin "Think Buck" T-style Mexican Blackbird solidbody Mojo Maker Tone Bender Zemaitis custom Marconi Lab Guitar 1929 Dixie Ukelele 1939 Rickenbacker Frying Pan ...and more! While BFG's cars 'n' guitars are the stuff of legend, no less intriguing are the tales behind his incredible music career. From teenage Houston garage rocker to the Rock and Roll Hall of Fame, the whole story is between these covers, told in the Good Reverend

Willie G's own words and illustrated with photos and memorabilia from his personal archive. As with many rockers, Billy F Gibbons' jones for hot rods and customs is the stuff of legend. But beyond this bona fide bluesman's mastery of the six-string and unrepentant love for internal combustion is a noted collector whose own designs have manifested themselves in hundreds of mind-bending cars and guitars. This is the definitive and official record of that genius.

For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. Transitions to Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.

In chassis development, the three aspects of safety, vehicle dynamics and ride comfort are at the top of the list of challenges to be faced. Addressing this triad of challenges becomes even more complex when the chassis is required to interact with assistance systems and other systems for fully automated driving. What is more, new demands are created by the introduction

of modern electric and electronic architectures. All these requirements must be met by the chassis, together with its subsystems, the steering, brakes, tires and wheels. At the same time, all physical relationships and interactions have to be taken into account.

Visualization is the graphic presentation of data -- portrayals meant to reveal complex information at a glance. Think of the familiar map of the New York City subway system, or a diagram of the human brain. Successful visualizations are beautiful not only for their aesthetic design, but also for elegant layers of detail that efficiently generate insight and new understanding. This book examines the methods of two dozen visualization experts who approach their projects from a variety of perspectives -- as artists, designers, commentators, scientists, analysts, statisticians, and more. Together they demonstrate how visualization can help us make sense of the world. Explore the importance of storytelling with a simple visualization exercise Learn how color conveys information that our brains recognize before we're fully aware of it Discover how the books we buy and the people we associate with reveal clues to our deeper selves Recognize a method to the madness of air travel with a visualization of civilian air traffic Find out how researchers investigate unknown phenomena, from initial sketches to published papers Contributors include: Nick Bilton, Michael E. Nazis, communists, Formula 1, Ferraris, the Cannonball Run, the Olympics, even a true love then found nearly 40 years later--Andrew Frankl's memoir reads like a work of fantasy. But it's all true. Frankl reflections on his 80 years of life, love, luck, and automobiles.

Electric Vehicle Integration into Modern Power Networks provides coverage of the challenges and opportunities posed by the progressive integration of electric drive vehicles. Starting with a thorough overview of the current electric vehicle and battery state-of-the-art, this work describes dynamic software tools to assess the impacts resulting from the electric vehicles deployment on the steady state and dynamic operation of electricity grids, identifies strategies to mitigate them and the possibility to support simultaneously large-scale integration of renewable energy sources. New business models and control management architectures, as well as the communication infrastructure required to integrate electric vehicles as active demand are presented. Finally, regulatory issues of integrating electric vehicles into modern power systems are addressed. Inspired by two courses held under the EES-UETP umbrella in 2010 and 2011, this contributed volume consists of nine chapters written by leading researchers and professionals from the industry as well as academia.

The book presents – based on the most recent research and development results worldwide - the perspectives of new propulsion concepts such as electric cars with batteries and fuel cells, and furthermore plug in hybrids with conventional and alternative fuels. The propulsion concepts are evaluated based on specific power, torque characteristic, acceleration behaviour, specific fuel consumption and pollutant emissions. The alternative fuels are discussed in terms of availability, production, technical complexity of the storage on board, costs, safety and infrastructure. The book presents summarized data about vehicles with electric and hybrid propulsion. The propulsion of future cars will be marked by diversity – from compact electric city cars and range extender vehicles for suburban and rural areas up to hybrid or plug in SUV's, Pick up's and luxury class automobiles.
