Always follow the instructions in the installation manual and heed all warnings. It is the installers responsibility to ensure that the installation of the heater, combustion air and exhaust system, fuel system and air ducting is performed according to all country specific regulations. To repair the heater systems, you need to have completed a CTH Technologies AB training course and have the appropriate technical documentation, special tools and equipment.

2kw Calaer air heater 4kw Calaer air heater

If the heater is operating with air recirculation, avoid sucking the flow of heated air into the air intake heater, Fig.13. Installation of air ducts to the air heater PLANAR-8DM is forbidden. When using a mounting box, outlet should be sealed in such a manner that the box itself did not get hot air. 3.5 Combustion Air Supply
