series of up-to-the-minute reviews addressing the role of oxidative stress in the aetiology of reproductive pathologies in the male. This volume represents by far the most detailed, authoritative review of the field that has been

The text encompasses the basic science of reactive oxygen species (ROS) production by mammalian spermatozoa, the way in which these highly reactive molecules are processed by the germ line and the

significance of this redox activity in the generation of a functional gamete.

The factors responsible for perturbing the delicate balance between physiological redox signaling on the one hand and oxidative stress on
