Privigen 100mg/ml solution for infusion
- Summary of ...

Rate of Infusion for Patients 40 kg and greater (88 lbs): If multiple sites are used, the rate set on the pump should be the rate per site multiplied by the number of sites (e.g., 30 mL x 4 sites = 120 mL/hr). The number of simultaneous sites should be limited to 8, or maximum infusion rate of 240 mL/hr.

Gammagard Liquid Dosage Guide -
Drugs.com

It is recommended that the initial infusion rate be used for the first 30 minutes. If well tolerated, the rate may be gradually increased to a maximum of 0.08 mL/kg per minute (8 mg/kg/min). Certain severe adverse drug reactions may be related to the rate of infusion.
