Artificial Intelligence and Machine Learning
are much trending and also confused terms
nowadays. Machine Learning (ML) is a subset
of Artificial Intelligence. ML is a science
of designing and applying algorithms that are
able to learn things from past cases. If some

made simple~~

How did you make this Artificial Intelligence chatbot demo? I created this AI demo way back in the year 2000, as part of an Internet Magazine article (pictured). This program uses Javascript in this way: It checks for certain "trigger" words that spark a preprogrammed response, which can make the program appear to understand you.

On a quest for artificial intelligence, Arthur Samuel at IBM coined the term "Machine Learning" in 1959. Machine Learning involves a lot of math as you'll see in a little bit but it's only a narrow section of data science. This field is also very similar to Statistics and that's because it's Applied Statistics.
