A guide to engine rebuilding includes discussions of removal, parts identification, cylinder head reconditioning, and engine assembly

This is a complete guide to multi-engine flying, from the first time a pilot transitions into a two-engine airplane through advanced ratings. Single engine and multi-engine aircraft differ in many critical ways--"Multi-Engine Flying" covers every one in clear, readable detail.

The Technical Reference Handbook is a desktop or shop reference for mechanical trades, manufacturing, and industrial environments. This book presents subject matter in a logical progression, summarizes key concepts, and provides easy-to-use formulas and tables. This revised edition updates information related to standards and evolving technology and adds or expands on many individual topics.

Social media has helped boost the culture of intoxication, a central aspect of young people's social lives in many Western countries. Initial research suggests that these technologies enable highly-nuanced, targeted marketing and innovations – creating new virtual spaces that alter the dynamics and consequences of drinking cultures in significant ways. Youth Drinking Cultures in a Digital World focuses on how pervasive social networking technologies contribute to drinking cultures. It brings together international contributions from leading researchers in this emerging field to explore how new technologies are reconfiguring the key themes, traditional interests, practices and concerns of alcohol-related research with young people. It is particularly concerned with three important areas, namely: identities, social relations and power alcohol marketing and commercialisation public health and regulating alcohol promotion. This innovative book includes original research and commentary and is a must-read for academics and researchers in the areas of public health, psychology, sociology, media studies, youth studies and alcohol studies.

A young doctor in an old people's center rescues a woman from a car accident in which she loses a leg. He takes her to hospital and disappears for fear of another malpractice suit, but she tracks him down, though not to sue him.

An assortment of 18 pieces to pick and mix - from easy classics to great new pieces, this collection covers it all! All Sorts is designed to fit the technique and capabilities of the young player, with easy-to-play piano accompaniments for the teacher. Titles: Emperor's Hymn * Trumpet Minuet * Duane Street * Print Problem * Balletto detto il Squilletti * March * Secret Agent * Yaye Yayo * Carnival of Venice * Blow the man down * Mean Machine * Itsuki No Komori Uta * Peacherine Rag * The Washington Post * Peterloo * Bossa Espana * March from the Nutcracker * Entr'acte from Carmen.

Few people understand the grief that comes with losing a child unless they have weathered that situation themselves. Dr. Janice Bell Meisenhelder has suffered through the loss of a child and knows the almost unbearable sorrow a bereaved mother feels. She has created this gentle guide to help mothers deal with their emotions and begin to heal. Her guide starts by describing the initial reactions to loss. She shows you the rhythms of grief and the basic emotions you will feel right after the event. She then moves on to handling anger, guilt, envy, and anxiety. As time passes, Meisenhelder warns about triggers and shows mothers how to handle holidays, birthdays, and family events. She offers advice on how to heal spiritually as well as emotionally. Meisenhelder also prepares you for ?tsunami days,? when the loss suddenly hits you all over again. She guides you through these days and on to the second and third year without your child. She encourages you to find ways to honor your child. In addition to guidance for mothers, Surviving the Unthinkable also contains information for those immediate family and friends who want to understand and support their loved ones during this difficult time.

Proteinases and their Inhibitors: Structure, Function, and Applied Aspects documents the proceedings of an international symposium organized by the Department of Biochemistry, Jozef Stefan Institute, E. Kardelj University, Ljubljana, and the Department of Organic Chemistry and Biochemistry, Rudjer Boskovic Institute, Zagreb, held in Portoroz, Yugoslavia, September 29-October 3, 1980. The volume contains 34 papers that are organized into four parts. Part I on biological functions includes studies such as muscle protein breakdown in human catabolic state and age-dependent changes in intracellular protein turnover. The papers in Part II, which deals with properties and structure of enzymes, cover topics such as structures and biological functions of cathepsin B and L; and human erythrocytes peptidases. Part III is devoted to industrial applications, such as exogenous proteinases in dairy technology and the application of immobilized proteinases. Part IV on proteinase inhibitors includes papers on thiol inhibitors of proteases and intracellular neutral proteinases and inhibitors. The papers in this volume provide new data, concepts, and visions which will not only prove useful, but will also stimulate further investigations of proteinases and their inhibitors.
