~~Excerpt. Keeping Patients Safe~~ builds on two prior reports. Harvey indicated Crossing the Quality Chasm and To Err Is Human, and very briefly to put it into context, To Err Is Human documented the fact that we have substantial errors that occur in health care. It focused on hospitals and in-patient settings, and errors that lead to the death of an estimated 44,000 to 98,000 patients a year.

A decade has passed since the Institute of Medicine (IOM) published Keeping Patients Safe: Transforming the Work Environment of Nurses. The report revealed that, “the typical work environment of nurses is characterized by many serious threats to patient safety.”. To counter these threats and reduce health care errors in hospitals and other settings where nurses care for patients, the 2004 report recommended fundamental transformation in the work environment of nurses—that is, changes ...
