community, or in the private sector. It is an unprecedented collaborative work -- the first working manual for sex crime investigators, written by sex crime investigators and forensic scientists. The key feature of this work is a thorough overview of the investigative and forensic processes related to sex crime investigation. It takes the reader through investigative and forensic processes in a logical sequence, showing how investigations of rape and sexual assault can and should be conducted from start to finish. It is intended to set the investigative and forensic standard for sex crimes investigation. It is designed to be accessible, in terms of language, not only to a detective or investigator who does hands on casework, but to the student in the classroom learning about the subject for the first time. This

circle track, drag, autocross, rally, and show vehicles. Beginning with a chapter on vehicle dynamics, with explanations of center of gravity, slip angle, yaw, roll, and pitch. Author Richard Newton then moves on to general information about tires and wheels--from materials and construction to use and maintenance. He also explores how this general information applies to specific types of vehicles, using pertinent examples throughout.
