Wireheads: "The Ringworld Engineers" by Larry Niven (Original Review, 1980-12-20) Reading some people's complaints about unpleasant events in SF (e.g. Louis Wu becoming a wirehead in "The Ringworld Engineers") reminded me of an article in Analog some time back. It was written by a founder of a company that would keep you in cryogenic storage until a cure was found for your disease, or the ...

The Ringworld Engineers (novel) | Larry Niven Wiki | Fandom

The Ringworld was a ribbon of unreasonably strong material, a million miles wide and six hundred million miles long, strung in a circle ninety-five million miles in radius with a sun at the center. The ring spun at seven hundred and seventy miles per second, fast enough to produce one gravity of centrifugal force outward. The unknown Ringworld engineers had layered the inner surface with soil ...

The Ringworld engineers used a device, called the cziltang brone in their language, to pass from the vacuum of their spaceports right through the scrith to the habitable surface of the Ringworld. The physical composition of scrith is unclear, but it appears to share some of the properties of a metal (albeit in a greatly exaggerated form): for instance, the high tensile strength, the ability to ...

Larry Niven Bibliography

The Ringworld Engineers is the second of Larry Niven's book about this enormous alien ring that orbits a far off planet. Readers of the first (and by far the best) of the series will know that when humans Louis Wu and Teela Brown arrive, along with the Kzin Speaker to Animals and the Puppeteer, civilisation on the Ringworld is in decline.
