With delicate language and wisdom, Madeleine Thien explores the longing of families pulled apart by conflicts between generations, cultures, and values. Each of these stories captures a deeply personal world in which characters struggle to reconcile family loyalty with individual desires. In "House," a 10-year-old girl longs for the alcoholic mother who left the house one day never to return. In "Dispatch," a woman tries to hold her marriage together even after finding proof that her husband is in love with someone else. In "A Map of the City," a young woman's troubled relationship with her father overshadows the course she takes in her adult life. Thien's fresh perspective and spare, haunting prose have already won her prizes and the praise of established masters. "Simple Recipes" is the beginning of a luminous writing career.

If you are a robot enthusiast who wants to quickly get the most out of Lego Mindstorms EV3, this is the book for you. Prior programming experience is useful to get the most out of this book, but not necessary.

This book presents an extensive analysis of the dynamics of discrete and distributed baroclinic vortices in a multi-layer fluid that characterizes the main features of the large and mesoscales dynamics of the atmosphere and the ocean. It widely covers the case of hetonic situations as well as the case of intrathermocline vortices that are familiar in oceanographic and of recognized importance for heat and mass transfers. Extensive typology of such baroclinic eddies is made and analysed with the help of theoretical development and numerical computations. As a whole it gives an overview and synthesis of all the many situations that can be encountered based on the long history of the theory of vortex motion and on many new situations. It gives a renewed insight on the extraordinary richness of vortex dynamics and open the way for new theoretical, observational and experimental advances. This volume is of interest to experts in physical oceanography, meteorology, hydrodynamics, dynamic systems, involved in theoretical, experimental and applied research and lecturers, post-graduate students, and students in these fields.

The Indian military setback against the Chinese attack in 1962 was high time for an honest soul-searching. Quite a few books written by Army officers have tried to tell their version of the untold story. Brig. Dalvi's account of the Sino-Indian War is by far the most remarkable and authentic. He was present in the theatre of war throughout, commanded a brigade and was held captive by the Chinese for seven months. In discussing the day-to-day events from 8 September to 20 October 1962 the author
