"This highly engaging landmark work, a natural history of exercise--by the author of the best seller *The Story of the Human Body*--seeks to answer a fundamental question: were you born to run or rest The first three parts of *Exercised* roughly follow the evolutionary story of human physical activity and inactivity, even as each chapter shatters a particular myth about exercise. Because we cannot understand physical activity without understanding its absence, Part One begins with physical inactivity. What are our bodies doing when we take it easy, including when we sit or sleep? Part Two explores physical activities that require speed, strength, and power, such as sprinting, lifting, and fighting. Part Three surveys physical activities that involve endurance, such as walking, running, or dancing, as well as their effect on aging. Part Four considers how anthropological and evolutionary approaches can help us exercise better in the modern world. How can we more effectively manage to exercise, and in what ways? To what extent, how, and why do different types and durations of exercise help prevent or treat the major diseases that are likely to make us sick and kill us?"--

ERF is a British truck manufacturer, and this book is a tribute to ERF's world-class long-hauler - the NGC, especially the Middle East examples - and to those who drove them. What did the ERF NGCs look like? How well did they perform? Where did they venture? What were they like to drive and to live in? And where did they stand in ERF's contribution to Britain's place in the history of the TIR-trail? Left-hand drive ERFs were, perhaps, one of the more

beguiling elements in the exotic pageantry of 1970s Middle-East trucking, and this particular model earned a reputation for excellent performance in the mountains - a theme that runs throughout the book. The vision of these magnificent machines hauling articulated road-trains over the Saudi mountains in Trans-Arabia livery is a treat. [Subject: History, Transportation]
