(PDF) Maintenance Scheduling for Electrical Equipment ...

Electrical maintenance is the upkeep and preservation of equipment and systems that supply electricity to a residential, industrial or commercial building. It may be performed by the owner or manager of the site or by an outside contractor. The work is commonly performed on a schedule based on the age of the building, the complexity of the electrical system or on an as-needed basis.

What is Electrical Maintenance? (with pictures)

Individual maintenance schedule records for boiler and pressure vessels, motors and engines, gear sets, electrical equipment and transformers are provided in this program. These schedules should be tracked on a computer based program or minimally retain the records on index cards or other written medium.
