children is covered in one volume." "The Manual of Pediatric Hematology and Oncology, 4E is essential for medical students, pediatric house staff, fellows in pediatric hematology/oncology seeking a systematic approach to these diseases, and as a guide for preparation for board examinations. This book will be extremely valuable to hematologists, oncologists, and internists who treat children and adolescents and need a ready reference for the up-to-date diagnosis and management of these diseases." --BOOK JACKET.

Since the last century, remarkable advances at both the basic and clinical levels have considerably improved our ability to evaluate and treat children with neurological disorders. Many cases seen by general pediatricians are primarily neurological accounting for up to 30% of all consultations to pediatrics with a high ratio of follow-up visits to new patients of about 3:1. This manual is a neurology reference for medical students and pediatric residents and is intended to supplement larger textbooks on pediatric neurology already available. Many of undergraduate medical students refer to deficient and oversimplified references that do not enable them to deal with pediatric neurology patients adequately. The manual presents a simplified, organized, and comprehensive problem based approach to common pediatric neurological disorders directed to the level of medical students, pediatric residents, general practitioners and general pediatricians. This e-book is thus a concise outline with practical tips to facilitate proper diagnosis and management of various neurological disorders. -- Publisher.
