The McHale F5500 round baler is equipped with a 15 knife chopper unit. As crop enters the spiral rotor, pairs of rotating tines feed the crop through the chopping unit. The double tines on the rotor ensure high output while the spiral layout reduces the load peaks as the

Chlorination in various forms has been the predominant method of drinking water disinfection in the United States for more than 70 years. The seventh volume of the

Drinking Water and Health series addresses current methods of drinking water disinfection and compares standard chlorination techniques with alternative methods. Currently used techniques are discussed in terms of their chemical activity, and their efficacy against waterborne pathogens,

Round the World in the
Wrong Season, by Eric
T. Wiberg - Written
between 1994 and 2009,
is a memoir of global
travel and an unfulfilled
college crush. The book
follows the narrator out
of school and across the
Pacific. At only 23 he
has command of a

68-foot Burmese-teak ketch built in Scotland thrust upon him. The owner is on a voyage home to his death, and along the way they hire sailors twice the skipper's age. They makes it to New Zealand in a storm which sinks seven yachts, then spends months shearing sheep and writing a memoir.

By the time the narrator makes a rendezvous with his college sweetheart (who has been teaching Thai students on the Burmese border), she seems to have all but forgotten him. This leads to a less than satisfactory denouement and puts at least one of them in the hospital. The book includes extensive

Lyrical Strategies
advances the highly
original idea that not all
literary fiction should be

read as a novel. Instead, Katie Owens-Murphy identifies a prominent type of American novel well suited to the reading methods of lyric poetry and exhibiting lyric frameworks of structural repetition, rhythm, figurative meaning, dramatic personae, and exclusive address. Owens-Murphy surveys a broad array of

writers: poets from the lyrical transatlantic tradition, as well as American novelists including Gertrude Stein, Jean Toomer, William Faulkner, Toni Morrison, Louise Erdrich, and Cormac McCarthy. Through a masterful reexamination of canonical works of twentieth-century American fiction

through the lens of lyric poetry, she reveals how many elements in these novels can be better understood as poetic and rhetorical figures (metaphysical conceit, polysyndeton, dramatic monologue, apostrophe, and so on) than as narrative ones. Making fresh contributions to literary theory and American fiction,

Lyrical Strategies will fascinate readers and scholars of the American novel, fiction, poetry, and poetics alike.
