This teacher guide is for trainers and assessors of the unit BSBMED301B: Interpret and Apply Medical Terminology. This unit is a unit in BSB31107: Certificate III in Business Administration (Medical). This nationally recognised unit is part of the Business Services Training Package. It provides relevant information, practical scenarios, and industry information for the support of student learning. Learners will achieve key learning outcomes with this resource, which is written specifically for the Australian medical environment. The teacher guide (with assessment component) contains:

- o Extensive session plans for pages up to page 126
- o Final assessment which is holistic and matching answers
- o Answers to all learner guide activities
- o Three oral revisions sheets with answers, which can be used as part of student feedback and/or assessment. These ensure learners can be assessed on listening skills only, and then respond verbally. They are also tested on their pronunciation skills.
- o A written revision sheet which is in the same format as the final written assessment. Thus it contains questions with the following headings: 1. Give the meaning of the following words 2. Write the medical terminology for the following words 3. Give the meaning of the following abbreviations and symbols 4. Using the symbols and abbreviations list, determine the meaning of the following passages 5. Rewrite the following passages using medical shorthand (symbols and abbreviations) 6. Read through the following passage and translate into non-medical (layman's) terms
- o A written assessment, which learners perform at home. Suggested answers are provided.
- o A final assessment, with suggested answers
- o A final oral assessment, including pronunciation , with answers.
- o An alternative assessment with answers is provided. This is a simpler holistic assessment which covers all performance criteria in one assessment.
- o Mapping of competencies for learner guide and assessments, which will reduce the workload involved with mapping of resources with the requirements of teaching nationally recognised training
- o Templates for assessment front cover, assessment plan, record of activities completed from learner guide, record of competency, and employability skills stocktake for the unit.

illustrations, including many new drawings and graphics. More than 25 animations and slide shows communicate difficult concepts that are impossible to convey with static illustrations. Easy-to-spot icons throughout the course alert you to Fast Facts, Learning Links, and Discussion Topics, encouraging active learning and linking students to the instructor and to one another. Bolded and linked terms within text connect you to definitions and audio pronunciations of terms, making it quick and easy to access the glossary and hear the term pronounced correctly. Extensive glossary of over 5,000 terms, including definitions. From anywhere in the program, you can click on a term and hear it pronounced in English and Spanish. Spanish translations of glossary terms - both written and audio - equip you to better communicate with Spanish-speaking patients. Exams and quizzes are provided for each module, ready for instructors to modify or use as is. Exams are automatically scored and reported to the instructor's grade book. Online course companion available in Angel/Evolve, Blackboard, WebCT, or eCollege course management systems and other LMS systems, providing everything instructors need to implement a high-quality online course or provide online support to a lecture-format class. Outcome-based learning ensures that you're meeting course objectives, provides instant feedback, and gives instructors information about learning outcomes. After each block of content is presented, a short assessment determines if the desired outcome or objective has been achieved. Medical report activities require you to look for information in the medical record to test your knowledge of medical terminology - a crucial skill for working in the clinical setting. More word-building and pronunciation exercises for additional practice and self-assessment. Catch That activities test your knowledge of information just presented, so you can quickly and easily re-read the material if you answer incorrectly. Listen In activities in case studies allow you to follow a patient with a particular medical condition through each online course module. You'll listen in as the health care provider and the patient interact, using the terminology you've become familiar with and encouraging you to apply it to a real-life situation. Glossary link embedded in the navigation bar at the top of each screen allows you to go to the master glossary from anywhere in the program, in addition to the usual links within each lesson. New options are available for different types of learners; for example, separate links are provided for "activities only" and "media only," so you can go directly to all of the activities and/or media for a particular module. New terms and abbreviations reflect advances in technology and changes in the healthcare delivery system.

Over 650 disease and disorder illustrations, over 450 anatomical illustrations, and many new drawings and graphics on each screen. Over 50 animations and slide shows with audio narration demonstrate physiologic processes. Helpful icons alert users to unique elements within the program, such as Factoids, Discussion Board, and Learning Links. Hypertext links direct users to related areas and to other resources for further study. Bold and hyperlinked terms within the text connect students to definitions and audio pronunciations. A glossary link on each screen provides access to the glossary from anywhere in the program for quick reference. Includes an extensive glossary of over 5,000 terms in both English and Spanish, including definitions, listed in alphabetical order. Student can click on a term and hear it pronounced correctly. Students can evaluate their mastery of module content by completing the Self-Mastery Quiz at the end of each module before taking the Self-Mastery Exam. The exam is automatically scored and reported to instructor. New design based on the new book design enhances the program's overall interface. New terms and abbreviations reflecting advances in technology and changes in health care delivery are included to reflect this new material in the text. More medical records activities familiarize students with report formats by requiring them to locate answers to questions in mock medical reports. A new tutoring feature in self-assessment quizzes prompts students to review relevant content and then try again to answer a question when it is answered incorrectly. New exercises and games engage students and hold their interest in the lessons. New animations, video clips, and rollovers demonstrate more processes and procedures, including rollovers that clarify anatomy illustrations by prompting a box to open with a short text explanation of that portion of the illustration.

Medical Terminology: An Illustrated Guide, 7e by Barbara Janson Cohen uses a stepwise approach to learning medical terminology. Part 1 describes how medical terms are built from word parts; Part 2 introduces body structures, diseases, and treatments; and Part 3 describes each body system. Individual chapters also build on knowledge in stages: the Key Terms sections list the terms most commonly used; more specialized terms are included in a later section entitled "Supplementary Terms." The current edition includes a robust student ancillary package delivered under the PASSport to Success brand, with assessment exercises, chapter quizzes, and searchable text online, and a complete suite of instructor resources. The addition of PrepU as a packaging option provides a powerful value to students - the online study experience helps them to understand and retain course information and helps instructors to better assess what their students may be struggling with.
