Forge is a collection of useful resources and mod loader, designed specifically to simplify compatibility between Minecraft Java Edition and multiple community-created mods. This tutorial will focus on the MDK for version 1.12.2 of Minecraft Java Edition, although Forge for 1.14.4 has been around for some time. An alternative to Forge is Fabric, but Java is still used to code mods either way. Things you should not do

~~Forge Mods | Planet Minecraft Community~~

Around November 2011, the Forge Mod Loader and Minecraft Forge were released. Forge allowed players to be able to run several mods simultaneously. Forge utilized MCF mappings. Forge also released a server version of Forge, which allowed mods to be run on servers, which eventually led to people creating modded servers.

This is the official documentation for MinecraftForge, the Minecraft modding API. This documentation is only for Forge, this is not a Java tutorial. Contribute to the docs at GitHub. Built with MkDocs using a custom theme. Hosted by Read the Docs.

~~Forge Documentation~~

Now to test our mod we need to make sure we have regular Minecraft forge downloaded. What we were working in was the developer kit for Forge. Now we need to access the Minecraft Forge client. Return to the same Minecraft Forge download page we were at earlier. Now once at this page click the regular install button shown.
