[MS-SSAS-T]: SQL Server Analysis Services Tabular

Microsoft SQL Server Analysis Services, SSAS, is an online analytical processing and data mining tool in Microsoft SQL Server. SSAS is used as a tool by organizations to analyze and make sense of information possibly spread out across multiple databases, or in disparate tables or files. Microsoft has included a number of services in SQL Server related to business intelligence and data warehousing. These services include Integration Services, Reporting Services and Analysis Services.

Microsoft Analysis Services - Wikipedia

Connect with SQL Server Management Studio (SSMS) to your source SQL Server 2012 SSAS Instance. Click "Connect" in the Object Explorer, select "Analysis Services...", enter the SSAS instance name and click the "Connect" button: Right-click on one of the databases name's and click "Back Up...".
