They provide theoretical perspectives on global orientations to social, political and economic transformations in the "New World Order" (NWO), and extend these with studies on the impacts of such transformations at the local, national, regional and global levels. The discussions highlight current concerns among academics and political commentators about the potential social impact of representations of the NWO in language and discourse. The present work is important in raising social consciousness towards the central role that language and discourse play in the construction of shifting/multiple identities. In this way, the roles of critical discourse analysis and indeed that of the analysts themselves are emancipative and socially transformative. This collection is a significant contribution to the ongoing critical discussion on global order discourse.

Through analysis of legislation and policy documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes?
