During the late Ottoman period (1856–1922), a time of contestation about imperial policy toward minority groups, music helped the Ottoman Greeks in Istanbul define themselves as a distinct cultural group. A part of the largest non-Muslim minority within a multi-ethnic and multi-religious empire, the Greek Orthodox educated elite engaged in heated discussions about their cultural identity, Byzantine heritage, and prospects for the future, at the heart of which were debates about the place of traditional liturgical music in a community that was confronting modernity and westernization. Merih Erol draws on archival evidence from ecclesiastical and lay sources dealing with understandings of Byzantine music and history, forms of religious chanting, the life stories of individual cantors, and other popular and scholarly sources of the period. Audio examples keyed to the text are available online.

Since the early twentieth century, 'balkanization' has signified the often militant fracturing of territories, states, or groups along ethnic, religious, and linguistic divides. Yet the remarkable similarities found among contemporary Balkan popular music reveal the region as the site of a thriving creative dialogue and interchange. The eclectic interweaving of stylistic features evidenced by Albanian commercial folk music, Anatolian pop, Bosnian sevdah-rock, Bulgarian pop-folk, Greek ethniki mousike, Romanian muzica orientala, Serbian turbo folk, and Turkish arabesk, to name a few, points to an emergent regional popular culture circuit extending from southeastern Europe through Greece and Turkey. While this circuit is predicated upon older cultural confluences from a shared Ottoman heritage, it also has taken shape in active counterpoint with a variety of regional political discourses. Containing eleven ethnographic case studies, *Balkan Popular Culture and the Ottoman Ecumene: Music, Image, and Regional Political Discourse* examines the interplay between the musicians and popular music styles of the Balkan states during the late 1990s. These case studies, each written by an established regional expert, encompass a geographical scope that includes Albania, Bosnia and Herzegovina, Bulgaria, the Republic of Macedonia, Croatia, Slovenia, Romania, Greece, Turkey, Serbia, and Montenegro. The book is accompanied by a VCD that contains a photo gallery, sound files, and music video excerpts.

Everyday articulations of music, place, urban politics, and inclusion/exclusion are powerfully present in Istanbul. This volume analyzes landscapes of music, community, and exclusion across a century and a half. An interdisciplinary group of scholars and artists presents four case studies: the rembetika, the music of the Asiks, the Zakir/Alevi tradition, and hip-hop, in Beyoglu, Üsküdar, the gentrifying Sulukule neighborhood, and across the metropolis.

of Egypt. Based on both the local records of various towns and villages in rural Egypt and the imperial orders of the Ottoman state, this book charts how changes in the control of natural resources fundamentally altered the nature of Ottoman imperial sovereignty in Egypt and throughout the empire. In revealing how Egyptian peasants were able to use their knowledge and experience of local environments to force the hand of the imperial state, *Nature and Empire in Ottoman Egypt* tells a story of the connections of empire stretching from canals in the Egyptian countryside to the palace in Istanbul, from the forests of Anatolia to the shores of the Red Sea, and from a plague flea's bite to the fortunes of one of the most powerful states of the early modern world.

Turks Across Empires tells the story of the pan-Turkists, Muslim activists from Russia who gained international notoriety during the Young Turk era of Ottoman history. Yusuf Akçura, Ismail Gasprinskii and Ahmet Agaoglu are today remembered as the forefathers of Turkish nationalism, but in the decade preceding the First World War they were known among bureaucrats, journalists and government officials in Russia and Europe as dangerous Muslim radicals. This volume traces the lives and undertakings of the pan-Turkists in the Russian and Ottoman empires, examining the ways in which these individuals formed a part of some of the most important developments to take place in the late imperial era. James H. Meyer draws upon a vast array of sources, including personal letters, Russian and Ottoman state archival documents, and published materials to recapture the trans-imperial worlds of the pan-Turkists. Through his exploration of the lives of Akçura, Gasprinskii and Agaoglu, Meyer analyzes the bigger changes taking place in the imperial capitals of Istanbul and St. Petersburg, as well as on the ground in central Russia, Crimea and the Caucasus. *Turks Across Empires* focuses especially upon three developments occurring in the final decades of empire: an explosion in human mobility across borders, the outbreak of a wave of revolutions in Russia and the Middle East, and the emergence of deeply politicized forms of religious and national identity. As these are also important characteristics of the post-Cold War era, argues Meyer, the events surrounding the pan-Turkists provide valuable lessons regarding the nature of present-day international and cross-cultural geopolitics.
