Presents a history of native American and white relations from the earliest encounters to the present day.

For many people, Native American architecture calls to mind the wigwam, tipi, iglu, and pueblo. Yet the richly diverse building traditions of Native Americans encompass much more, including specific structures for sleeping, working, worshipping, meditating, playing, dancing, lounging, giving birth, decision-making, cleansing, storing and preparing food, caring for animals, and honoring the dead. In effect, the architecture covers all facets of Indian life. The collaboration between an architect and an anthropologist, Native American Architecture presents the first book-length, fully illustrated exploration of North American Indian architecture to appear in over a century. Peter Nabokov and Robert Easton together examine the building traditions of the major tribes in nine regional areas of the continent from the huge plank-house villages of the Northwest Coast to the moundbuilder towns and temples of the Southeast, to the Navajo hogans and adobe pueblos of the Southwest. Going beyond a traditional survey of buildings, the book offers a broad, clear view into the Native American world, revealing a new perspective on the interaction between their buildings and culture. Looking at Native American architecture as more than buildings, villages, and camps, Nabokov and Easton also focus on their use of space, their environment, their social mores, and their religious beliefs. Each chapter concludes with an account of traditional Indian building practices undergoing a revival or in danger today. The volume also includes a wealth of historical photographs and drawings (including sixteen pages of color illustrations), architectural renderings, and specially prepared interpretive diagrams which decode the sacred cosmology of the principal house types.

In a record spanning five centuries of interchange, this history of native American and white relations moves from encounters with early explorers and settlers to the present-day growth of Indian power and concerns.

From the author of How the World Moves: A revelatory new look at the hallowed, diverse, and threatened landscapes of the American Indian For thousands of years , Native Americans have told stories about the powers of revered landscapes and sought spiritual direction at mysterious places in their homelands. In this important book, respected scholar and anthropologist Peter Nabokov writes of a wide range of sacred places in Native America. From the " high country " of California to Tennessee ' s Tellico Valley, from the Black Hills of South Dakota to Rainbow Canyon in Arizona, each chapter delves into the relationship between Indian cultures and their environments and describes the myths and legends, practices, and rituals that sustained them.

Fur traders observed that no other Indians of the Upper Missouri were so well dressed or bragged of their tribal affiliation as frequently or as vociferously as the Crow. Two Leggings, the teller of the story you are about to read, was above all else a Crow warrior. His story tells us quite as much of tribal values that motivated and guided his actions as it does of his personal escapades. He was one of the last Crow Indians to abandon the warpath.

Publisher Description

In the most comprehensive and detailed cultural-geographic study ever conducted of the American Indian reservations in the forty-eight contiguous states, Klaus Frantz explores the reservations as living environments rather than historical footnotes. Although this study provides well-researched documentation of the generally deplorable living conditions on the reservations, it also seeks to discover and highlight the many possibilities for positive change. Informed by both historical research and extensive fieldwork, this book pays special attention to the natural resource base and economic outlook of the reservations, as well as the crucial issue of tribal sovereignty. Chapters also cover the demography of American Indian groups and their socioeconomic status (including standard of living, employment, and education). A new afterword treats some of the developments since the book's initial publication in German, such as the effects of the 1988 Indian gaming law that allowed Indian reservations to operate gambling establishments (with mixed success). "Provides a good overview of the basic questions and problems facing reservation Indians today."—Peter Bolz, Journal of American History (on the German edition)

Native American Studies covers key issues such as the intimate relationship of culture to land; the nature of cultural exchange and conflict in the period after European contact; the unique relationship of Native communities with the United States government; the significance of language; the vitality of contemporary cultures; and the variety of Native artistic styles, from literature and poetry to painting and sculpture to performance arts.

Using contemporary autobiography theory and literary, historical, and ethnographic approaches, Wong explores the transformation of Native American autobiography from pre-contact oral and pictographic personal narratives through late nineteenth-/early twentieth-century life histories to written contemporary autobiographies. This book expands the definition of autobiography to include non-written forms of personal narrative and non-Western concepts of self, highlighting the incorporation of traditional tribal modes of self-narration with Western forms of autobiography and charting the historical transition from orality to literacy.
