The first of two volumes, The Works of Gilles Deleuze I: 1953-1969 introduces, book by book, the philosopher's daunting corpus, from his early monographs on Hume, Nietzsche, Kant, and Bergson; to the "literary clinic"; and, finally, to the landmark publication of Difference and Repetition and Logic of Sense.

This practical, interactive resource is designed to be used by professionals who work with children and young people who have Social, Emotional and Mental Health needs and Speech, Language and Communication needs. Gaps in language and emotional skills can have a negative impact on behaviour as well as mental health and self-esteem. The Language for Behaviour and Emotions approach provides a systematic approach to developing these skills so that young people can understand and work through social interaction difficulties. Key features include: A focus on specific skills that are linked to behaviour, such as understanding meaning, verbal reasoning and emotional literacy skills. A framework for assessment, as well as a range of downloadable activities, worksheets and resources for supporting students. Sixty illustrated scenarios that can be used flexibly with a wide range of ages and abilities to promote language skills, emotional skills and self-awareness. This invaluable resource is suitable for use with young people with a range of abilities in one to one, small group or whole class settings. It is particularly applicable to children and young people who are aiming to develop wider language, social and emotional skills including those with Developmental Language Disorder and Autism Spectrum Disorder.

This new edition focuses on preparing your students to assume the role as a significant member of the health-care team and manager of care, and is designed to help your students transition to professional nursing practice. Developed as a user-friendly text, the content and style makes it a great tool for your students in or out of the classroom. (Midwest).

From #1 New York Times bestseller Mike Lupica! It's simple. All Billy Raynor wants to do is shoot. After all, he is one of the best shooters in the league. But with his dad as his coach, and his parents newly separated, somehow everything's become complicated. His brother Ben hardly talks anymore. His mom is always traveling on business. And his dad is always on his case about not being a team player. But when Ben's piano recital falls on the same day as the championship game, it's Billy who teaches his dad the meaning of being a team player.

DIVRich harvest of blossoms, vines, and other floral decorations has an unlimited variety of applications, allowing images to serve equally well as individual motifs or as running borders. Approximately 325 designs. /div

You know what happens when bad boys get what they wish for? Everything. . . New York Times Bestselling Author Lori Foster Playing Doctor Attitude makes a huge difference in bed. It could be Axel Dean's motto. The sexy physician likes his women with sensual moxie, and Libby Preston definitely seems to fit that bill. There's that naughty grin. That hot bod. Her eager kisses and cheeky insults. Her. . .admitted virginity. Whoa. Okay, cue cold shower. Axel may not be an honorable man, but he has his limits. Except Libby won't take no for an answer. She's determined to have someone show her what she's been missing, and suddenly, Axel can't bear to think of Libby playing doctor with anyone else. . . USA Today Bestselling Author Erin McCarthy The Lady of the Lake Pro baseball player Dylan Diaz is pretty sure he's going to hell. When you rescue a drowning woman from a lake your first thought should be, "Are you okay?" not, "Can I make mad, passionate love to you?" But the minute sputtering kindergarten teacher Violet Caruthers is on Dylan's boat, that's all he can think about. Maybe it's the potent combo of a nun's personality inside a stripper's body. Maybe it's the way she drives him crazy with desire and laughter. Or maybe, Dylan's finally found what's been missing in his life, and he's not about to let go. . .

Astronomy For Beginners is a friendly and accessible guide to our universe, our galaxy, our solar system and the planet we call home. Each year as we cruise through space on this tiny blue-green wonder, a number of amazing and remarkable events occur. For example, like clockwork, we'll run head-on into asteroid and cometary debris that spreads shooting stars across our skies. On occasion, we'll get to watch the disk of the Moon passing the Sun, casting its shadow on the face of the Earth, and sometimes we'll get to watch our own shadow as it glides across the face of the Moon. The Sun's path will constantly change across the daytime sky, as will the stars and constellations at night. During this time, we'll also get to watch the other majestic planets in our solar system wander the skies, as they too circle the Sun in this elaborate celestial dance. Astronomy For Beginners will explain this elaborate celestial dance - the patterns of the heavens, the equinoxes and the solstices, the major meteor showers, and the solar and lunar eclipses. In addition, Astronomy For Beginners will also take you on a guided tour of the solar system and beyond. We'll discover how the way we measure time itself is intimately related to celestial phenomena, and we'll furthermore explore our historical and continuing mission to understand our place in this marvelous universe in which we find ourselves. Oh yeah, one more thing: Astronomy For Beginners will not only help you become an expert in space and time - but it also promises to be a pretty fun ride!

Based on the successful Baby Owner's Manual, The Baby Owner's Maintenance Log presents a refreshing alternative to traditional sugar-sweet baby journals. Hip parents can record all major milestones and measurements in these pages, including the arrival of the unit, fuel preferences and speech activation. Spiral binding, hilarious illustrations and a bound-in envelope for keepsakes make this guided journal a great shower gift.

"The Great God Pan is a haunting, deeply affecting play about the interaction of identity, psychology and pathology. Ms. Herzog writes with keen sensitivity to the complex weave of feelings embedded in all human relationships, with particular attention to the way we tiptoe around areas of radioactive emotion." - New York Times "Whatever the ideal contemporary American drama is, it has to look a lot like The Great God Pan. It is provocative and subtle, slowly, carefully revelatory, sweetly moving, thought-provoking, funny and insightful." - New York Observer "An intelligent, delicately articulate writer." - Village Voice "A moving and unsettling look at the nature of identity and the vagaries of memory. With subtlety and compassion, Herzog contemplates how well we can really know ourselves." - Backstage Jamie's life in Brooklyn seems just fine: a beautiful girlfriend, a burgeoning journalism career, and parents who live just far enough away. But when a possible childhood trauma comes to light, lives are thrown into a tailspin. Unsettling and deeply compassionate, The Great God Pan tells the intimate tale of what is lost and won when a hidden truth is suddenly revealed. Amy Herzog's plays include 4000 Miles (Pulitzer Prize finalist), After the Revolution and Belleville. Ms. Herzog is the recipient of numerous awards, including the Whiting Writers' Award, an Obie Award and the Helen Merrill Award for Aspiring Playwrights.

This three-volume set of books presents advances in the development of concepts and techniques in the area of new technologies and contemporary information system architectures. It guides readers through solving specific research and analytical problems to obtain useful knowledge and business value from the data. Each chapter provides an analysis of a specific technical problem, followed by the numerical analysis, simulation and implementation of the solution to the problem. The books constitute the refereed proceedings of the 2017 38th International Conference "Information Systems Architecture and Technology," or ISAT 2017, held on September 17-19, 2017 in Szklarska Por?ba, Poland. The conference was organized by the Computer Science and Management Systems Departments, Faculty of Computer Science and Management, Wroclaw University of Technology, Poland. The papers have been organized into topical parts: Part I- includes discourses on topics including, but not limited to, Artificial Intelligence Methods, Knowledge Discovery and Data Mining, Big Data, Knowledge Discovery and Data Mining, Knowledge Based Management, Internet of Things, Cloud Computing and High Performance Computing, Distributed Computer Systems, Content Delivery Networks, and Service Oriented Computing. Part II-addresses topics including, but not limited to, System Modelling for Control, Recognition and Decision Support, Mathematical Modelling in Computer System Design, Service Oriented Systems and Cloud Computing and Complex Process Modeling. Part III-deals with topics including, but not limited to, Modeling of Manufacturing Processes, Modeling an Investment Decision Process, Management of Innovation, Management of Organization.
