The world's greatest and most celebrated magicians, conjurors and illusionists can make us believe the unbelievable, the impossible possible. But, of course, just like everybody else these conjurors had to start at a beginning. They too had to learn the simple (but effective) card tricks, the easy (but imaginative) coin tricks and the basic (but still mindboggling) sleight of hand tricks before advancing to more innovative and radical skills and techniques. Hey Presto! is a book full to the rafters with simple magic tricks, the perfect companion for a beginner as well as a wonderful gift book for those wishing to get into magic and are not sure how. The book contains over 40 card, coin and magic tricks for the beginner. If you want the ultimate introduction into the world of magic then, Hey Presto!, here it is!

First Cut 2: More Conversations with Film Editors presents a new collection of twelve interviews with award-winning film editors who discuss the art and craft of editing in the twenty-first century. As a follow-up to the successful First Cut: Conversations with Film Editors (now celebrating its 20th anniversary), this new volume explores the transition of editing from the age of celluloid to the digital age. These extraordinarily articulate editors share their passion about film, offer detailed practical examples from their films to explain their process as well as their challenges, and imbue each interview with unique personality, humor, and cinematic insights. First Cut 2 continues the tradition of the first volume by interviewing both fiction and documentary editors, contributing to a rich, holistic appreciation of editing. It also introduces a significant interview with an independent filmmaker/editor to emphasize today's multiple opportunities for aspiring filmmakers to make their own "small films" and achieve success. Together with the first volume, First Cut 2 offers a panoramic survey of film editing and preserves its history through the voices of its practitioners. The stories told will engage students, inform general filmgoers, and even enlighten industry professionals.

This “ suspenseful narrative history ” (Maureen Corrigan, NPR) brings to life the momentous eclipse that enthralled a nation and thrust American science onto the world stage. On a scorching July afternoon in 1878, at the dawn of the Gilded Age, the moon's shadow descended on the American West, darkening skies from Montana Territory to Texas. This rare celestial event—a total solar eclipse—offered a priceless opportunity to solve some of the solar system's most enduring riddles, and it prompted a clutch of enterprising scientists to brave the wild frontier in a grueling race to the Rocky Mountains. Acclaimed science journalist David Baron, long fascinated by eclipses, re-creates this epic tale of ambition, failure, and glory in a narrative that reveals as much about the historical trajectory of a striving young nation as it does about those scant three minutes when the blue sky blackened and stars appeared in mid-afternoon. Lauded as a “ sweeping, compelling ” (Wall Street Journal) work of science history, American Eclipse tells the story of the three tenacious and brilliant scientists who raced to Wyoming and Colorado to observe the rare event. Dedicating years of “ exhaustive research to reconstruct a remarkable chapter of U.S. history ” (Scientific American), award-winning writer David Baron brings to three-dimensional life these competitors—the planet-hunter James Craig Watson, pioneering astronomer Maria Mitchell, and the ambitious young inventor Thomas Edison—to thrillingly re-create the fierce jockeying of nineteenth-century American astronomy. With spellbinding accounts of train robberies and Indian skirmishes, the mythologized age of the Wild West comes alive as never before. An “ enthralling ” (Daniel Kevles) and magnificent portrayal of America's dawn as a scientific superpower, American Eclipse depicts a young nation that looked to the skies to reveal its towering ambition and expose its latent genius.
