Occupational exposure to heat can result in injuries, disease, reduced productivity, and death. To address this hazard, the National Institute for Occupational Safety and Health (NIOSH) has evaluated the scientific data on heat stress and hot environments and has updated the Criteria for a Recommended Standard: Occupational Exposure to Hot Environments [NIOSH 1986a]. This updated guidance includes information about physiological changes that result from heat stress, and relevant studies such as those on caffeine use, evidence to redefine heat stroke, and more. Includes: Immediately Dangerous to Life & Health Concentrations; International Chemical Safety Cards; NIOSH Certified Equipment List; NIOSH Manual of Analytical Methods; NIOSH Pocket Guide to Chemical Hazards; OSHA Sampling & Analytical Methods; Recommendations for Chemical Protective Clothing; Specific Medical Tests Published for OSHA Regulated Substances; Toxicologic Review of Selected Chemicals; & 2000 Emergency Response Guidebook. Includes Windows & Macintosh versions of Netscape Communicator & Adobe Acrobat Reader.

Quick Selection Guide to Chemical Protective Clothing provides the reader with the latest information on Selection, Care and Use of Chemical Protective garments and gloves. Topics in the widely-used reference guide include Selection and Use of Chemical Protective Clothing, Chemical Index, Selection Recommendations, Glossary, Standards for Chemical Protective Clothing, Manufactures of Chemical Protective Clothing and European requirements for chemical resistant gloves. The key feature of the book is the color-coded selection recommendations. The red, yellow or green indications are highly appreciated by the users. This sixth edition of the Quick Selection Guide to Chemical Protective Clothing has been updated, to include approximately 1,000 chemicals/chemical brands or mixture of chemicals more than twice the information provided in the original edition. The performance of 9 generic materials and 32 proprietary barriers are compared against the 21 standard test chemicals listed in ASTM F1001. The color-coded recommendations against the broader list of materials now contain 27 representative barrier materials. This best selling pocket guide is the an essential field source for HazMat teams, spill responder, safety professionals, chemists and chemical engineers, industrial hygienists, supervisors, purchase agents, salespeople and other users of chemical protective clothing.

Describes the types of data, and their format, in the 1993 edition of RTECS. Includes detailed file description: computer tape, on-line and CD-ROM. The database has expanded to include primary skin and eye irritation, mutagenic effects, reproductive effects, tumorigenic effects, and acute toxicity data. A most important recent addition is other toxic effects data from multiple dose studies.

Pearson Publishing and the Center for the Advancement of Process Technology (CAPT) have partnered to publish a series of books designed to aid in the education and development of technicians in the field of Process Technology. These books, which are based on a set of nationally identified objectives, are designed to address the core needs of both industry and education. Reviewers from a broad array of process industries and education institutions participated in the production of these materials so that the widest audience possible would be represented in the presentation of the content. The book is intended for use in community colleges, technical colleges, universities and corporate settings in which process technology is taught. An invaluable resource to be used throughout a process technology career, this book is a complete reference for both theory and practical application. The Center for the Advancement of Process Technology (CAPT) currently offers several instructor manuals and student workbooks for their books. Currently these must be PURCHASED by the instructor or institution. These materials, order forms, and pricing, can be viewed and purchased at this website: <http://www.capttech.org/curriculum/products.php>

This report provides a critical review of toxicologic, epidemiologic, and other relevant data on jet-propulsion fuel 8, a type of fuel in wide use by the U.S. Department of Defense (DOD), and an evaluation of the scientific basis of DOD's interim permissible exposure level of 350 mg/m3
