Question Paper

Budget literacy is
Grade 12
defined as 'the ability

to read, decipher,

and understand

public budgets to

enable and enhance

meaningful citizen

participation in the

budget process'. It is

comprised of two

main parts - (i) a

technical

File Type PDF

Nssc

Understanding of public budgets, including familiarity with government spending, tax rates and public debt and;

(ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the

File Type PDF

Nssc

economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy

File Type PDF

Nssc

education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments --

File Type PDF

Nssc

simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively

File Type PDF

Nssc

participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing

their government's
fiscal policy
objectives and
measures, and the
confidence and sense
of social
responsibility to

strategies and
assessment
approaches for
budget literacy
education, and
presents lessons that
are relevant for the
development,
improvement, or
scaling up of budget
literacy initiatives.

This new, fully
revised edition aims

to serve as a guide for agricultural research scientists and other practitioners in writing papers for publication. It also looks to provide a resource manual for training courses in scientific writing. There are three new chapters on reporting statistical results, communicating

science to non-
scientific audiences
and electronic
publishing. In
addition, the original
chapters have all
been rewritten to
