Nuclear Strategizing: Deterrence and Reality; Rethinking ...

Given these psychological imperatives, it should be clear that relying on deterrence to limit the risk of nuclear attack appears to be little more than an absurdist fantasy of the kind portrayed so well in Dr. Strangelove. This reality holds important implications going forward, because any strategy that depends on the rationality of actors, clear signaling, accurate perceptions, solely state actors, nonproliferation, and perfect security invites catastrophic consequences.

Revenge is a dish best served nuclear. US deterrence ...

Deterrence is not a condition achieved from simply possessing nuclear weapons; it is based on the perception of military power in general. Nuclear weapons drastically enhance a state's strength by creating the capacity to cause catastrophic amounts of damage in a very short period of time, with strikes that are largely indefensible. Due to the unique characteristics of nuclear weapons, nuclear states become less likely to engage in conflict with each other.

Deterrence, Norms, and the Uncomfortable Realities of a ...

Deterrence assumes that decision makers can rationally assess the costs and benefits of their actions. Yet the literatures on foreign policy decision making and behavioral economics both argue that people frequently use heuristics, past experience, and emotion to insert significant irrationality into their decision making. This is especially true in situations of extreme uncertainty and stress, both of which are likely to characterize any decision about nuclear use.
