In this stimulating collection of studies, Dr. Arendt, from the standpoint of a political philosopher, views the crises of the 1960s and early '70s as challenges to the American form of government. The book begins with "Lying in Politics," a penetrating analysis of the Pentagon Papers that deals with the role of image-making and public relations in politics. "Civil Disobedience" examines the various opposition movements from the Freedom Riders to the war resisters and the segregationists. "Thoughts on Politics and Revolution," cast in the form of an interview, contains a commentary to the author's theses in "On Violence." Through the connected essays, Dr. Arendt examines, defines, and clarifies the concerns of the American citizen of the time.--From publisher description.

At its background are feminist concerns, but also concerns with violence that press against the feminist problematic and push its boundaries. The book's main project is ethico-political "understanding" and, therefore, it is also about finding an ethico-political language for violence that escapes the standard idioms in which violence is spoken. Weaving biographical fragments with theory, the book addresses the very thinking of violence, the possibility and implications of its comprehension, genocide (the Nazi Judeocide in particular) and nationalism (especially in its Zionist form), as well as women's encounters with violence and second-wave feminist engagement with the martial arts.
